Theme of the Event

The World Earth Day falls on April 22. It reminds us of the importance of environment conservation. It is an annual event observed across the globe to demonstrate support for environmental protection. It reminds us about the importance of environment conservation and sustainability, encouraging us to come together and take action for a healthier planet and brighter future. The day raises awareness and inspires change, fostering a deep connection with nature. The theme for World Earth Day 2024 is Planet vs Plastics. The theme aims to bring attention to the serious issue of plastic pollution and how it harms nature. It aims to end plastic for planetary health.

The Dept. of Basic Sciences and Humanities of Dr. Lankapalli Bullayya College of Engineering successfully organized the World Earth Day on March 22 in Block 8 Seminar Hall to bring awareness on environmental protection. The event was coordinated by Dr. N. Swathi, Asst. Professor in Engineering Chemistry. The B. Tech first year students have attended the function with enthusiasm. The participants took part in PPT, Paper and Poster presentations. Prof. G. Lokeswara Reddy spoke about the environmental degradation and ecological imbalance. He presented a PPT on the theme of the event namely Planet vs Plastics.

No Plastic Drive

(26-09-2023)

Theme of the Event:

The "no plastic" drive refers to a global movement aimed at reducing the use of single-use plastics and minimizing the environmental impact of plastic pollution. It encompasses various efforts, policies, and initiatives geared toward raising awareness about the detrimental effects of plastic on the environment and encouraging individuals, businesses, and governments to adopt more sustainable alternatives.

Several strategies are employed in these drives:

- **Awareness campaigns:** These initiatives educate people about the harmful effects of plastic pollution on ecosystems, wildlife, and human health. They emphasize the importance of reducing, reusing, and recycling plastic items.
- **Policy changes:** Many governments worldwide have implemented bans or restrictions on single-use plastics such as bags, straws, and styrofoam containers. Some places charge fees for plastic bags or promote the use of biodegradable alternatives.
- **Innovation and alternatives:** Encouraging the development and use of biodegradable plastics, as well as promoting reusable alternatives like cloth bags, stainless steel straws, and glass containers, helps reduce reliance on traditional plastics.
- **Community participation:** Engaging communities, schools, businesses, and organizations in cleanup drives, recycling programs, and eco-friendly practices fosters a collective effort towards reducing plastic waste.
- **Corporate responsibility:** Many businesses are adopting environmentally friendly practices by reducing plastic packaging, redesigning products to be more sustainable, and investing in recyclable materials.

The "no plastic" drive is part of a larger effort to address the environmental challenges posed by plastic pollution and promote a more sustainable way of living. While progress has been made, there's still much work to be done to significantly reduce the impact of plastic on our planet.

Theme of the Event

The theme of World Water Day 2024 is 'Water for Peace'. When we cooperate on water, we create a positive ripple effect – fostering harmony, generating prosperity and building resilience to shared challenges.

Water is the essence of life and is critical for sustainable development, healthy ecosystems, and human survival.

Observed annually, World Water Day provides an invaluable opportunity to reaffirm our commitment to protecting and conserving our planet's water resources for future generations. With around 2.2 billion people living without access to safe water, as per the UNICEF data, this day plays a crucial role in promoting action to ensure everyone has access to safe, affordable drinking water by 2030.

Water, the elixir of life, is not just a resource but a fundamental element for peace and prosperity. Let's continue to raise awareness and inspire action to tackle the water and sanitation crisis.

"Action for water is action for Peace"

Let's commit to work together, to make water a force for cooperation, harmony and stability, and so help to create a world of peace & prosperity for all

NDLI Club & Dept. of Basic Sciences and Humanities of Dr. Lankapalli Bullayya College of Engineering successfully organized an awareness program on conservation of water on March 22nd 2024 in Block 8 Seminar Hall, based on the theme -2024 "Leveraging Water for Peace".

The event was coordinated by Dr. N. Swathi, Asst. Professor in Engineering Chemistry. The student coordinator Sharon Rayapati, conducted the program with active participation from 8 teams. Nearly 110 participants took part in PPT, Paper and Poster presentations.

Respected Sir

Sub: Requisition for permission to conduct plantation on World Environment Day-
Reg

I wish to bring it to your kind notice that the NSS Unit-2 is planning to organize plantation in the college campus on 05-06-2024 on the occasion of World Environment Day in coordination with the Department of Electrical and Electronics Engineering under the Green9 energy saving club.

I request your good self to accord permission to conduct this program.

Thanking you sir,

Yours sincerely,

B.Satish Naidu

About the Institute:

Dr. Lankapalli Bullayya College of Engineering encourages and promotes education and keeps its focus on empowerment and their personality development with which they can face the challenges of modern world. The broad objective of the institution is to provide the right opportunities to students for learning the higher skills in new technologies and building their extraordinary careers in industry and research organizations.

Acclaimed by the student community as an outstanding women engineering college in the smart city Visakhapatnam, Andhra Pradesh, Dr. Lankapalli Bullayya College of Engineering, was established by The Society for Collegiate Education in 2010 with the objective to produce technologists and scientists who would engage in research, design and development to help building the nation. Our Campus is ideally located in the heart of the city on 10 acre land.

The curriculum places emphasis on basic topics in engineering sciences, design and experimental methods. The College's faculty and staff strive hard with their limitless potential and technical expertise to create ingenious Engineers.

About NSS:

The National Service Scheme plays a crucial role in fostering civic responsibility, social awareness, and personal development among Indian youth. It serves as a platform for students to contribute positively to society while enriching their own lives through meaningful experiences.

World Environment Day

(05-06-2024)

Theme of the Event:

Established by the United Nations General Assembly in 1973, World Environment Day is the largest international event focused on the environment, coordinated by the UN Environment Programme (UNEP). Millions of people from governments, businesses, civil society, and educational institutions participate annually to raise awareness and take action on environmental issues, aiming to protect the planet's future.

The theme for 2024, "Our Land, Our Future. We are #GenerationRestoration," emphasizes the importance of restoring land, combating desertification, and enhancing resilience to drought.

Currently, up to 40% of the world's land is degraded, impacting around 3.2 billion people globally due to desertification. Moreover, projections suggest that by 2050, over three-quarters of the world's population will be affected by drought. This year's World Environment Day precedes the United Nations Convention to Combat Desertification (UNCCD) COP16, which will be held in December 2024 in the United Kingdom. This conference is anticipated to be the largest-ever international gathering on land and drought.

A Drive on Plantation (13-08-2023 & 14-08-2023)

Theme of the Event:

A plantation drive typically refers to a coordinated effort to plant trees, often organized by governments, non-profit organizations, or community groups. These initiatives aim to increase green cover, combat deforestation, mitigate climate change, and promote environmental sustainability.

Plantation drives have numerous benefits, including:

- **Environmental Benefits:** Trees absorb carbon dioxide, release oxygen, prevent soil erosion, and provide habitat for various species.
- **Health and Aesthetic Benefits:** They improve air quality, beautify landscapes, and create natural spaces for relaxation and recreation.
- **Economic Benefits:** Trees contribute to the economy through products like timber, fruits, and other forest-based resources.

A drive on plantation is conducted by the NSS-Unit-2 under the programme officer Mr.B.Satish Naidu. Many of the students actively participated in this "Go Green" event on 13-08-2023 and on 14-08-2023, Mayor of Visakhapatnam Smt. Golagani Hari Venkata Kumari alongside with the Secretary and Correspondent, Dr.G.Madhu Kumar also did the plantation.
