Subject: Permission request for the conduction of Faculty Development Programme -Reg

The Department of Electrical and Electronics Engineering is planning to conduct a one week Faculty Development Programme (online through google meet) on "Recent Trends in Electrical Engineering" in the dates of 24-04-2023 to 28-04-2023 from 2:00PM to 4:30PM at Dr Lankapalli Bullayya College of Engineering, Visakhapatnam. The list of Resource persons are as follows.

S.No.	Name of the speaker	Designation
1	Dr. T Bharath Kumar	Senior Market Analyst, Central Strategic Analysis, Statkraft, Delhi
2	Dr.S.Sasidhar	Assistant professor, Dept. of Electrical Engineering, IIT Goa
3	Dr.P.E.S.N.Raju	Assistant professor, Dept. of Electrical Engineering, IIT Indore
4	Dr.Ravindra	R&D, Germany
5	Dr.D.DeepakChowdary	Principal, Dr. L. Bullayya College of Engineering

I request you to permit us to conduct this program on the specified date at Dr. Lankapalli Bullayya College of Engineering, Visakhapatnam.

Thanking you Sir,

Yours Sincerely,

(H.O. / E)

About the Institute:

Dr. Lankapalli Bullayya College of Engineering encourages and promotes education and keeps its focus on empowerment and their personality development with which they can face the challenges of modern world. The broad objective of the institution is to provide the right opportunities to students for learning the higher skills in new technologies and building their extraordinary careers in industry and research organizations.

Acclaimed by the student community as an outstanding women engineering college in the smart city Visakhapatnam, Andhra Pradesh, Dr. Lankapalli Bullayya College of Engineering (for women), was established by The Society for Collegiate Education in 2010 with the objective to produce technologists and scientists who would engage in research, design and development to help building the nation. Our Campus is ideally located in the heart of the city on 10 acre land.

The curriculum places emphasis on basic topics in engineering sciences, design and experimental methods. The College's faculty and staff strive hard with their limitless potential and technical expertise to create ingenious Engineers.

About the EEE Department:

The Department of Electrical & Electronics Engineering was established in 2010-2011. The department offers a four year degree program Admission process is through state- wide entrance examination i.e EAMCET. The department is resourceful in terms of infrastructure and state-of-the-art facilities to pursue academic education and research in niche areas of technology. Liberal funding from the college management has enabled the Department to acquire specialized research facilities. The highly qualified and experienced faculty in adequate strength with zero attrition rates is one of the most significant features of the department. Electrical & Electronics Engineering is an enlightening branch which requires overall peripheral knowledge about all other branches and in-depth knowledge of Electrical & Electronics Engineering.

Theme of the Event:

This faculty development program (FDP) on recent trends in electrical engineering is a training program designed to update the knowledge and skills of faculty members in the field of electrical engineering. The program is intended to equip faculty members with the latest information, tools, and techniques that they can use in their teaching, research, and professional activities.

The FDP on recent trends in electrical engineering would cover a range of topics related to the latest developments and advancements in the field. The FDP could include a combination of lectures that would provide participants with a comprehensive understanding of the latest trends in electrical engineering. The program could also provide participants with opportunities to network with other faculty members, industry experts, and researchers in the field.

About the Institute

Dr. Lankapalli Bullayya College of Engineering (DLBC) is a private college located in Visakhapatnam, Andhra Pradesh, INDIA. It was established as Women's college in the year 2010 and later converted to coeducation in the year 2020. The college is affiliated with Andhra University (AU), Visakhapatnam. DLBC is dedicated to providing high-quality technical education. The college offers undergraduate courses in various disciplines of engineering, including Computer Science and Engineering, Electronics and Communication Engineering, Electrical and Electronics Engineering and Civil Engineering. The curriculum is designed to equip students with the skills and knowledge required to meet the challenges of the rapidly changing technological landscape. DLBC is committed to empowering students through education and creating a pipeline of skilled and confident engineers who can contribute to the development of the country.

One week Faculty Development Programme on

"TEACHING LEARNING METHODS FOR OUTCOME BASED EDUCATION"

Organized by

Department of Electronics and Communication Engineering

Theme of the Event:

This faculty development program (FDP) on Teaching Learning Methods For Outcome Based Education is a training program designed to update the knowledge and skills of faculty members in the field of engineering. The program is intended to equip faculty with the latest information, tools, and techniques that they can use in their teaching, research, and professional activities.

The FDP on Teaching Learning Methods For Outcome Based Education would cover a range of topics related to the latest developments and advancements in the field. The FDP include a combination of lectures like Introduction to Flipped Learning, experiential learning etc.

ABOUT THE COLLEGE

Dr. Lankapalli Bullayya College of Engineering formerly known as Dr. Lankapalli Bullayya College of Engineering for Women was started in 2010 as a part of the group of educational institutions run by the Society for Collegiate Education, Visakhapatnam by the philanthropists and educationalists who visualized the need for serving the society by means of affordable, accessible and qualitative, value-based education. There were four branches of Engineering in the college including CSE, ECE, EEE and Civil with an annual intake of 120 each for CSE and ECE while the intake for EEE and Civil being 60 seats. The Women's Engineering College then evolved into a full-fledged Co-education Engineering college in the academic year 2020-21. The college is Affiliated to Andhra University, Visakhapatnam and approved by AICTE, New Delhi. Our students participated actively and won prizes in the National Science Day Celebrations conducted by NSTL, Defence Research and Development Organization, Visakhapatnam in the category of Innovation for Societal Benefits Model category in February 2022. The college has a dedicated R&D cell, Entrepreneurship Cell and Internal Quality Assurance Cell that continue to guide and mentor the Teaching community towards academic excellence.

ABOUT THE ECE DEPARTMENT

The Department of Electronics and Communication Engineering was established in the year 2010 with an annual intake of 60 students for B.Tech Program. The Department has a mix of both experienced and young faculty. All the faculty members actively involve themselves in improving their education qualifications and research works. Faculty and students are encouraged to attend and participate in various seminars, workshops and training programs conducted by various reputed organizations to enhance their knowledge. The management also supports the faculty members with financial assistance to attend workshops, conferences and seminars.

• ABOUT THE PROGRAM

This One week faculty development program (FDP) on Teaching Learning Methods For Outcome Based Education is a training program designed to update the knowledge and skills of faculty members in the field of electronics engineering. The program is intended to equip faculty members with the latest information, tools, and techniques that they can use in their teaching, research, and professional activities.

The FDP on Teaching Learning Methods For Outcome Based Education would cover a range of topics related to the latest developments and advancements in the field. The FDP could include a combination of lectures that would provide participants with a comprehensive understanding of the latest trends in Electronics and communication engineering. The program could also provide participants with opportunities to network with other faculty members, industry experts, and researchers in the field.

Schedule of the Administrative Training Program on MS Office

1		Session-1	9.00am - 11.00am	MS word
11.00AM TO 11.30AM(Tea Break)				
2		Session-2	11.30am - 1.30 pm	MS PowerPoint
1.30PM TO 2.30PM(Lunch Break)				
3		Session-3	2.30pm - 4.30pm	MS Excel

Session- 1: MS- Word

Microsoft Word is a versatile tool for report writing, providing a comprehensive platform for creating professional and organized documents. Its features include various formatting options, styles, and templates that streamline the report-writing process. Users can easily structure their reports with headings, subheadings, and a table of contents. Word's spell check and grammar check features help ensure the accuracy and clarity of written content.

In addition, Microsoft Word supports the insertion of tables, charts, and images, allowing for the presentation of data in a visually appealing manner. The ability to add footnotes, citations, and a bibliography simplifies referencing and enhances the credibility of the report.

Session 2: MS- PowerPoint

Microsoft PowerPoint is a presentation software developed by Microsoft. It enables users to create dynamic and visually engaging slideshows for presentations. With a user-friendly interface, PowerPoint allows the incorporation of text, images, charts, and multimedia elements into slides. It provides various themes, transitions, and animations to enhance the overall visual appeal. PowerPoint is widely used in business, education, and other settings to convey information effectively. Its features facilitate seamless presentation creation, enabling users to communicate ideas in a structured and engaging manner.

Session 3: MS Excel

Microsoft Excel is powerful spreadsheet software that has become a cornerstone for data analysis, organization, and computation. Known for its grid interface, Excel allows users to input and manipulate data efficiently, offering a wide range of mathematical and statistical functions. Users can create formulas, perform complex calculations, and generate charts and graphs for data visualization. Excel's versatility extends to budgeting, financial modeling, and various business applications.

With features like conditional formatting and sorting, Excel enables users to manage and present data in a structured and visually appealing manner. Its collaborative capabilities, including real-time co-authoring, make it a valuable tool for teamwork and data sharing. Microsoft Excel remains a go-to application for professionals across diverse fields, contributing significantly to streamlined data management and analysis.

About the Institute:

Dr.Lankapalli Bullayya College of Engineering encourages and promotes education and keeps its focus on empowerment and their personality development with which they can face the challenges of modern world. The broad objective of the institution is to provide the right opportunities to students for learning the higher skills in new technologies and building their extraordinary careers in industry and research organizations.

Acclaimed by the student community as an outstanding women engineering college in the smart city Visakhapatnam, Andhra Pradesh, Dr.Lankapalli Bullayya College of Engineering (for women), was established by The Society for Collegiate Education in 2010 with the objective to produce technologists and scientists who would engage in research, design and development to help building the nation. Our Campus is ideally located in the heart of the city on 10 acre land.

The curriculum places emphasis on basic topics in engineering sciences, design and experimental methods. The College's faculty and staff strive hard with their limitless potential and technical expertise to create ingenious Engineers.

About the ECE Department:

The Department of Electronics and Communication Engineering was established in the year 2010 with an annual intake of 60 students for B.Tech Program. The Department has a mix of both experienced and young faculty.

All the faculty members actively involve themselves in improving their education qualifications and research works.

Faculty and students are encouraged to attend and participate in various seminars, workshops and training programs conducted by various reputed organizations to enhance their knowledge. The management also supports the faculty members with financial assistance to attend workshops, conferences and seminars.

Theme of the Event:

This faculty development program (FDP) on recent trends in Electronics and communication engineering is a training program designed to update the knowledge and skills of faculty members in the field of electronics engineering. The program is intended to equip faculty members with the latest information, tools, and techniques that they can use in their teaching, research, and professional activities.

The FDP on recent trends in Electronics and communication engineering would cover a range of topics related to the latest developments and advancements in the field. The FDP could include a combination of lectures that would provide participants with a comprehensive understanding of the latest trends in Electronics and communication engineering. The program could also provide participants with opportunities to network with other faculty members, industry experts, and researchers in the field.

ABOUT THE COLLEGE

Dr.Lankapalli Bullayya College of Engineering formerly known as Dr.Lankapalli Bullayya College of Engineering for Women was started in 2010 as a part of the group of educational institutions run by the Society for Collegiate Education, Visakhapatnam by the philanthropists and educationalists who visualized the need for serving the society by means of affordable, accessible and qualitative, value-based education. There were four branches of Engineering in the college including CSE, ECE, EEE and Civil with annual intake of 120 each for CSE and ECE while the intake for EEE and Civil being 60 seats. The Women's Engineering College then evolved into a full-fledged Co-education Engineering college in the academic year 2020-21. The college is Affiliated to Andhra University, Visakhapatnam and approved by AICTE, New Delhi.

Our students participated actively and won prizes in the National Science Day Celebrations conducted by NSTL, Defence Research and Development Organization, Visakhapatnam in the category of Innovation for Societal Benefits Model category in February 2022. The college has a dedicated R&D cell, Entrepreneurship Cell and Internal Quality Assurance Cell that continue to guide and mentor the Teaching community towards academic excellence.

Dates: 13-05-2022 to 17-05-2022

The program is organized in Two Sessions to introduce variety of topics by different Resource persons. The Objective of the programme is to bring out the recent and emerging trends in Electronics and Communication Engineering. All the eminent speakers gave their valuable lecture on Robotics in Communication Networks, Machine Learning, The advent of 5G technology, Advance Electronic Materials and many.

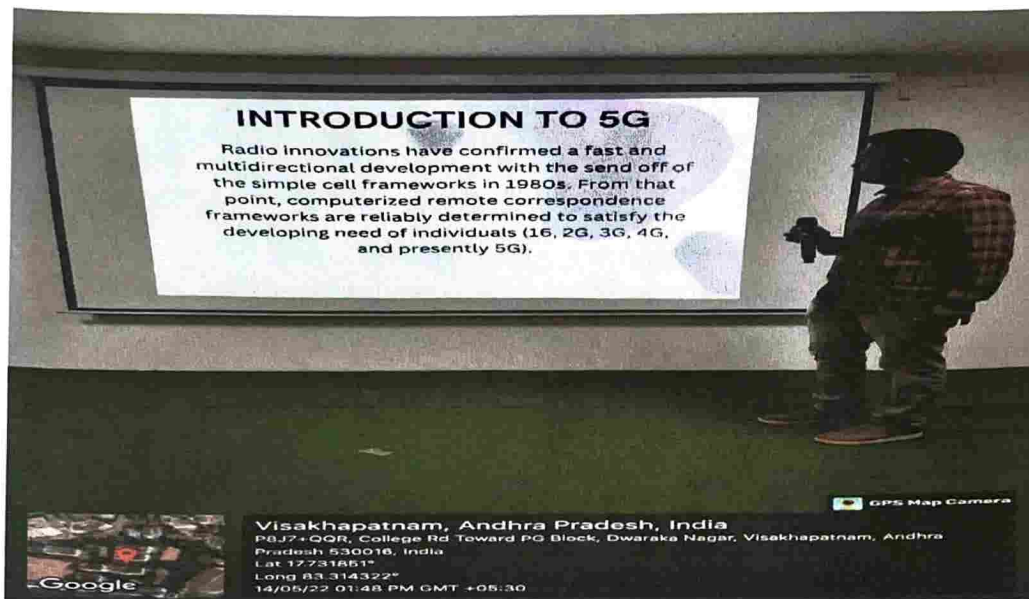

Dr. J Babu Professor, Electronics and Communication Engineering, Dr. L. Bullayya college of Engineering gave a brief introduction to Internet Of Things (IoT).

Mr.P.Sahitya Kiran Assistant Professor, Electronics and Communication Engineering, NSRIT delivering his speech on Artificial Intelligence(AI) in the second session

Mr.B.Sangeeth kumar, Assistant professor, Electronics and Communication Engineering ,Sanketika Institute Of Tech & Management giving his speech on Robotics in Communication.

Mr.K.Rajesh kumar, Asst.Professor,Electronics and Communication Engineering, Dr. L. Bullayya college of Engineering delivering his speech on 5G Technologies.

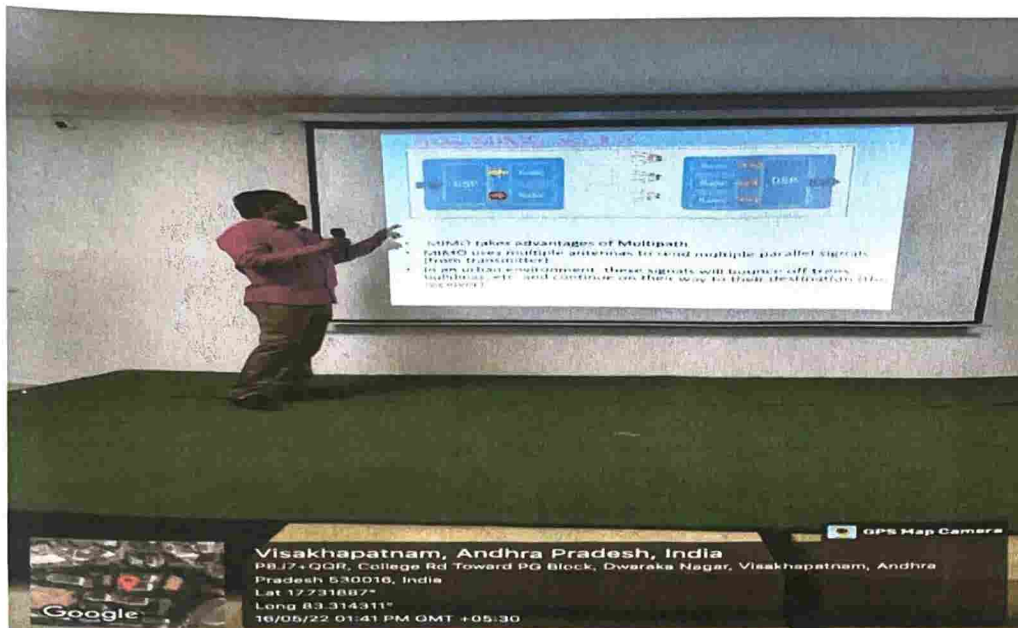

DR.K.V.RAMANA RAO,Assoc Professor, Electronics and Communication Engineering Sanketika Vidya Parishad Engineering College,giving his speech on Increased Automation.

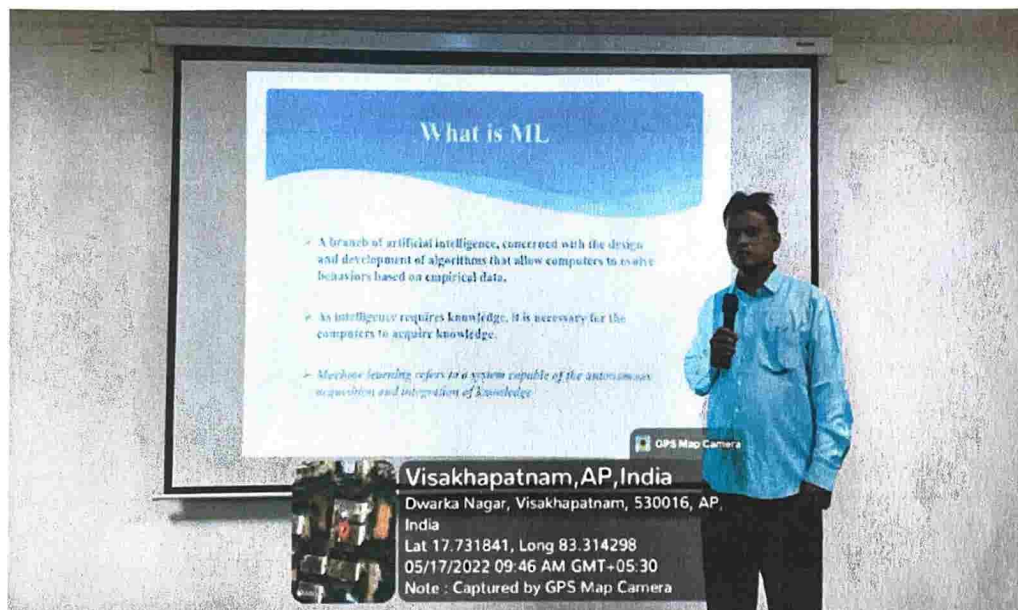

Mr.R.Santosh Sai, Asst.Professor,Electronics and Communication Engineering,
 Dr. L. Bullayya college of Engineering delivering his speech on Nano Technology

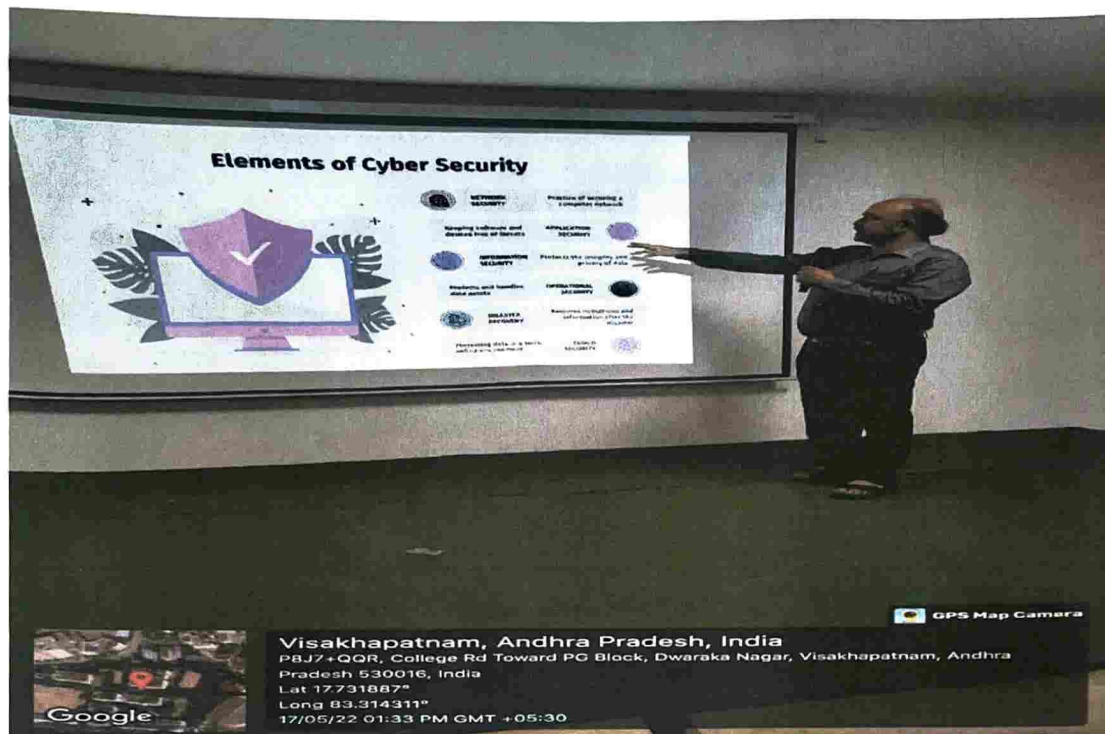

Mr.P.Sahitya Kiran Assistant Professor, Electronics and Communication
 Engineering,NSRIT delivering his speech on Advanced Electronics Materials in
 the first session on 4th day of FDP.

Mr.B.Sangeeth kumar, Assistant professor, Electronics and Communication Engineering ,Sanketika Institute Of Tech & Management giving his speech on MIMO Technology.

Dr. J Babu Professor, Electronics and Communication Engineering, Dr. L. Bullayya college of Engineering gave a brief introduction in Machine Learning.

Dr.K.V.Ramana Rao,Assoc Professor, Electronics and Communication Engineering Sanketika Vidya Parishad Engineering College,giving his speech on Cyber Security on the last day final session of FDP.

About the Institute:

Dr. Lankapalli Bullayya College of Engineering encourages and promotes education and keeps its focus on empowerment and their personality development with which they can face the challenges of the modern world. The broad objective of the institution is to provide the right opportunities to students for learning the higher skills in new technologies and building their extraordinary careers in industry and research organizations.

Acclaimed by the student community as an outstanding women engineering college in the smart city Visakhapatnam, Andhra Pradesh, Dr. Lankapalli Bullayya College of Engineering, was established by The Society for Collegiate Education in 2010 with the objective to produce technologists and scientists who would engage in research, design and development to help build the nation. Our Campus is ideally located in the heart of the city on 10 acre land.

The curriculum places emphasis on basic topics in engineering sciences, design and experimental methods. The College's faculty and staff strive hard with their limitless potential and technical expertise to create ingenious Engineers.

About the CSE Department:

The department of computer science and engineering was started in the year 2010 with the aim of equipping the students sufficiently with the required theoretical foundation and practical skills needed to make them active participants in the highly rewarding field of Computer Science and Information Technology. State-of-the-art infrastructure combined with a team of highly qualified and committed teachers who strive unceasingly to enable students achieve their goals characterize the academic environment. In accordance with the vision of the institution which aims to use education as a tool to create value added citizens, the department provides adequate opportunities for students to acquire knowledge from various sources such as Massively Online Open Courseware, NDL lectures from IITs in addition to the regular classroom teaching.

The department which has a student branch of Computer Society of India conducts regular technical events such as workshops and seminars that bring awareness among the students regarding the latest trends and developments in the ever changing IT field.

About the College

Dr.Lankapalli Bullayya College of Engineering formerly known as Dr.Lankapalli Bullayya College of Engineering for Women was started in 2010 as a part of the group of educational institutions run by the Society for Collegiate Education, Visakhapatnam by the philanthropists and educationalists who visualized the need for serving the society by means of affordable, accessible and qualitative, value-based education. There were four branches of Engineering in the college including CSE, ECE, EEE and Civil with an annual intake of 120 each for CSE and ECE while the intake for EEE and Civil being 60 seats. The Women's Engineering College then evolved into a full-fledged Co-education Engineering college in the academic year 2020-21. The college is Affiliated to Andhra University, Visakhapatnam and approved by AICTE, New Delhi.

Our students participated actively and won prizes in the National Science Day Celebrations conducted by NSTL, Defence Research and Development Organization, Visakhapatnam in the category of Innovation for Societal Benefits Model category in February 2022. The college has a dedicated R&D cell, Entrepreneurship Cell and Internal Quality Assurance Cell that continue to guide and mentor the Teaching community towards academic excellence.

About the CSE Department

The department of Computer Science and Engineering was started in the year 2010 with the aim of equipping the students sufficiently with the required theoretical foundation and practical skills needed to make them active participants in the highly rewarding field of Computer Science and Information Technology. State-of-the-art infrastructure combined with a team of highly qualified and committed teachers who strive unceasingly to enable students achieve their goals characterize the academic environment. In accordance with the vision of the institution which aims to use education as a tool to create value added citizens, the department provides adequate opportunities for students to acquire knowledge from various sources such as Massively Online Open Courseware,

NOL lectures from ITs in addition to the regular classroom teaching. The department which has a student branch of Computer Society of India conducts regular technical events such as workshops and seminars that bring awareness among the students regarding the latest trends and developments in the ever changing IT field.

Most importantly the department facilitates the conduct of training classes to the students in domain skills and soft skills in association with the Skill Development Centre of the college which immensely helps the students in fine tuning their skills in performing well in various placement drives conducted in the college campus or elsewhere. The department takes pride in empowering the hard working community of students and strongly reiterates its commitment to ensuring that each student who gains admission realizes her true potential and gains the needed technical and life skills needed to a successful life and career after graduation.

About the FDP

In the era of Globalization where Knowledge economies play a vital role in enhancing the productivity of individuals, organizations and societies and then equitably distributing their outcomes, seamless Network connectivity and Resource sharing play the role of an enabler as well as a bottleneck. Organizations address this through the use of individuals who are skilled in proper maintenance and detection of potential vulnerabilities before they actually occur. These individuals are called Ethical Hackers and the present Faculty Development Programme aims to provide an overview of Ethical Hacking.

Course Contents

Introduction to Ethical Hacking, Footprinting and Reconnaissance
Network Scanning, Vulnerability Assessment
Post-Exploitation Techniques, Web Application Penetration Testing
Mobile Device Hacking IoT Security

Theme of the Event:

The faculty development program (FDP) on "Ethical Hacking" is a training initiative designed to rejuvenate the expertise and proficiencies of the esteemed faculty members within the Campus college. The program is meticulously crafted to empower the faculty with the most recent insights, tools, and methodologies essential for enriching their teaching, research, and professional engagements.

The "Ethical Hacking" FDP has a diverse array of topics, exploring the latest breakthroughs and advancements in the realm of ethical hacking and digital security. The program comprises a dynamic blend of immersive lectures, offering participants a holistic grasp of the cutting-edge trends in computer science and engineering. Furthermore, the program encourages active engagement by fostering valuable connections with peers, industry luminaries, and distinguished researchers within the domain.

Five Day Faculty Development Programme on Ethical Hacking :

Report on Day 1 Session 1: Introduction to Ethical Hacking

Ms.G.Sandhya, Asst. Professor from VIIT, Visakhapatnam provided the required background and context regarding the need for Ethical Hacking in the present globalization context. She provided an overview regarding the various types of Hacking as well as the evolution of Ethical Hacking to its present state. She provided information to the participants regarding the demand for Ethical Hackers and therefore the need for both Faculty Members and Students to be aware of the computational concepts of Ethical Hacking so that they may be utilized in Industry, Academia and Research.

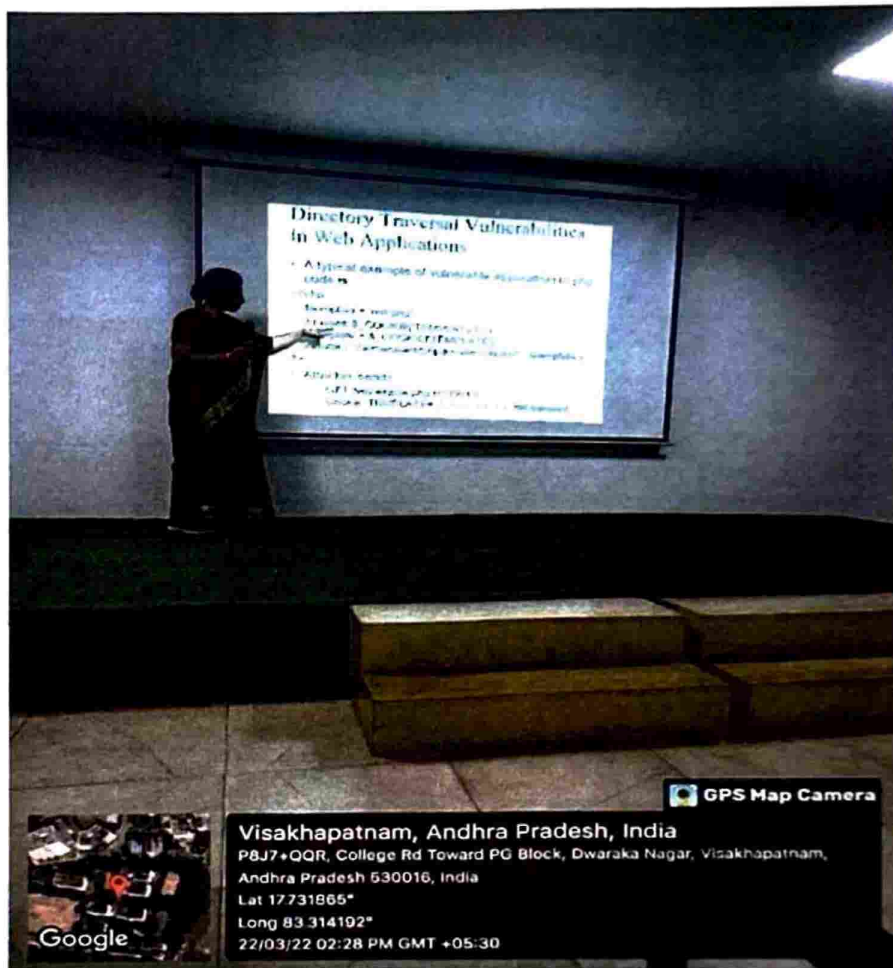

Dr.G.Vamsi Krishna, Asst. Professor from Dr.Lankapalli Bullayya College of Engineering, Visakhapatnam focused on the important task of vulnerability detection for system security focusing on the techniques of Footprinting and Reconnaissance. He explained the differences between Footprinting and Reconnaissance, while the former focused on gathering data about a specific targeted system to identify possibility of penetration while the later comprised methods used to achieve the same in a covert manner.

Report on Day 2 Session 1: Network Scanning

MsK.N.S.Chitra., Asst. Professor from GVPCOE, Visakhapatnam discussed the role played by Network Scanning in identification of vulnerabilities. She said that it is a process where an attacker uses tools and techniques to gather information about the target. This information may be as simple as the active hosts within the network, to complex discoveries like gathering the OS of the hosts, open ports and active vulnerabilities on the host. The Resource person provided examples where this strategy was deployed successfully.

Report on Day 2 Session 2: Vulnerability Assessment

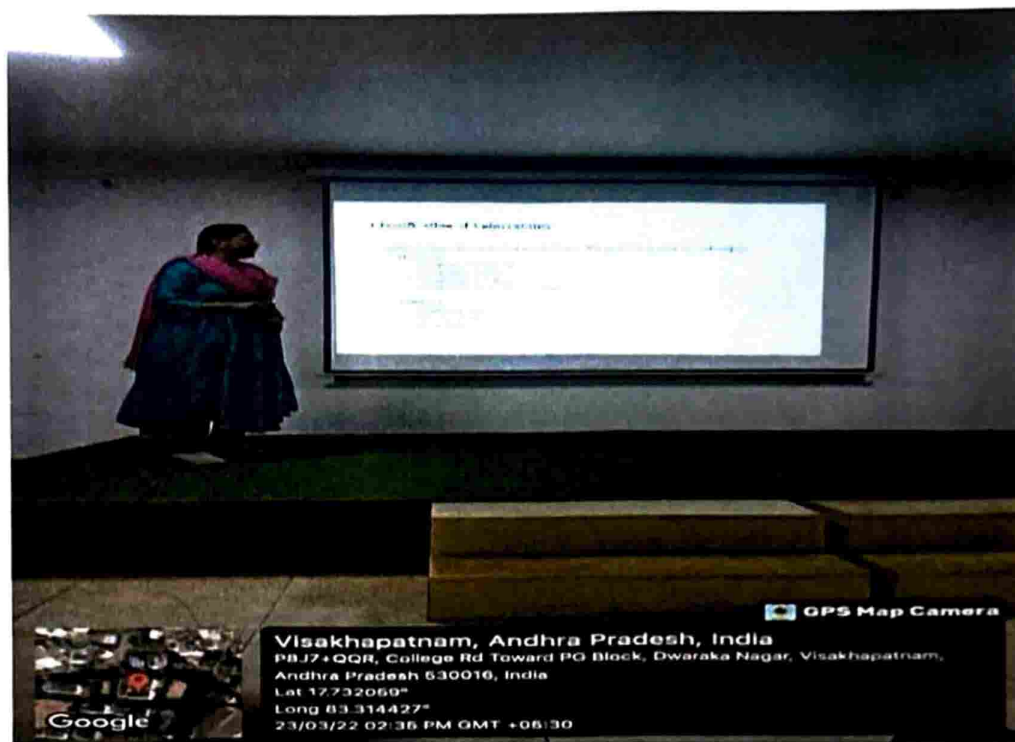

Dr.D.Madhavi, Head of the Department of CSE and Convenor of the FDP discussed the various types of Vulnerability assessments. She initially stated that vulnerability assessment is the process of defining, identifying, classifying and prioritizing vulnerabilities in computer systems, applications and network Infrastructures. It may be also be considered to be the testing process used to identify and assign severity levels to as many security defects as possible in a given timeframe. This process may involve automated and manual techniques with varying degrees of intensity as required.

Report on Day 3 Session 1: Exploiting Vulnerabilities

Mrs.V.Saradha, Asst. Professor Avanthi College, Visakhapatnam provided an overview regarding how existing vulnerabilities in a system may be exploited. The Resource person initially stated that vulnerability is a weakness that can be exploited by cybercriminals to gain unauthorized access to a computer system. After exploiting a vulnerability, an attacker can run malicious code, install malware, and even steal sensitive data. The Resource person also explained regarding two major types of exploits including Remote and Local exploits. While the Remote exploits work over a network and exploits the vulnerability without prior access to the vulnerable system, Local exploits requires prior access to the vulnerable system and increases the privilege of the attacker past those granted by the security administrator.

Report on Day 3 Session 2: Post-Exploitation Techniques

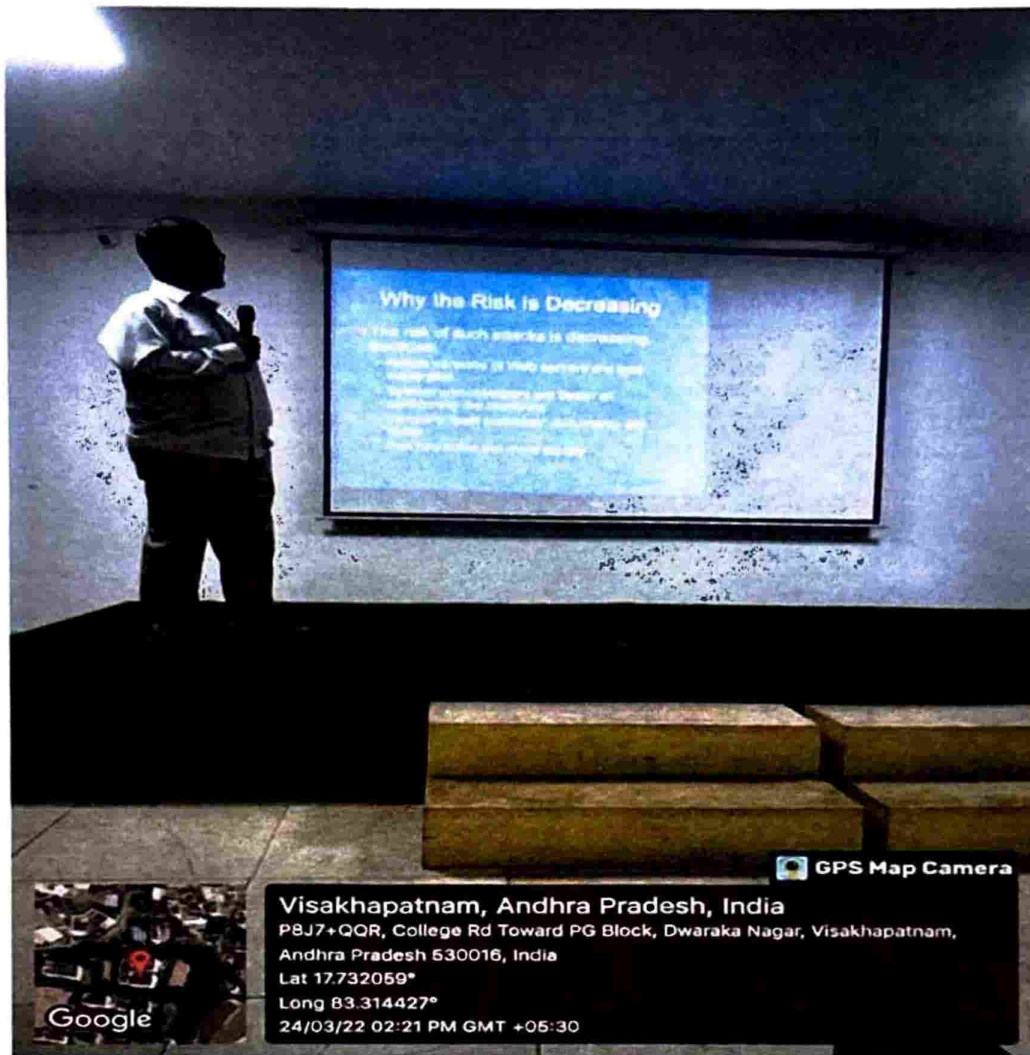

Dr.K.Anuradha discussed the role played by Post-Exploitation Techniques in overall Cyber security. The Resource person stated that the purpose of the Post Exploitation phase is to determine the value of the compromised machine and to maintain control of the machine for later use. She observed that Post-exploitation allows the tester to demonstrate the impact of a successful attack and the potential damage that an attacker could cause. Finally she concluded that Post-exploitation techniques help organizations to identify weaknesses in their security scenario and take steps to mitigate them.

Report on Day 4 Session 1: Web Application Hacking Basics

Ms. Padmaja, Software Developer, eSF Labs Ltd, Hyderabad discussed the basics of Web Application Hacking. She observed that Web application hacking or web app hacking is the act of exploiting vulnerabilities and weaknesses in web applications to gain unauthorized access, manipulate data, or perform malicious activities. It involves identifying security flaws in web apps and leveraging them to compromise their integrity, confidentiality, or availability. She also provided overview of various types of Web application hacks including: Cross-Site Scripting (XSS), SQL Injection, Cross-Site Request Forgery (CSRF), Remote File Inclusion (RFI) and Local File Inclusion (LFI), XML External Entity (XXE) Attacks, Server-Side Request Forgery (SSRF), File Upload Vulnerabilities and Session Hijacking and Session Fixation.

Report on Day 4 Session 2: Web Application Penetration Testing

Mr.Syed Mujib Rahaman, Associate Professor at Dr.Lankapalli Bullayya College of Engineering, Visakhapatnam discussed the importance of Web Application Penetration Testing. The Resource Person stated that it is a type of ethical hacking engagement designed to assess the architecture, design and configuration of web applications. Assessments are conducted to identify cyber security risks that could lead to unauthorized access and/or data exposure.Web Application Penetration Testing methodology involves four main steps including Information Gathering, Vulnerability Testing, Exploitation, Risk Assessment, and Reporting.

Report on Day 5 Session 1: Mobile Phone Hacking

Ms. V Divya Sai, Software Developer, eSF Labs Ltd, Hyderabad discussed the various ways in which Mobile phones may be hacked. The increasing use of Mobile phones has also increased the possibility that these devices may cause potential security incidents. The Resource person provided the various methods using which the Mobile devices may be subject to intrusion. She said that intruders would try to use methods such as Social engineering, Malvertising, Smishing, Malware, Pretexting, Breaking in via Bluetooth and Man-in-the-middle Wi-Fi attacks to hack into a Mobile phone. The Resource person also suggested to the audience to implement safety practices for secure Mobile phone usage. She also provided case studies of the various techniques as well as their success rates in exploiting Mobile phone vulnerabilities.

Report on Day 5 Session 2: IoT Security

Dr.D.RajaKishor, Professor at Dr.Lankapalli Bullayya college of Engineering, Visakhapatnam, discussed the importance of focusing attention on the rapidly proliferating field of IoT devices. The Resource person initially introduced the audience to the architecture of IoT devices. He then discussed the similarity between these devices and the conventional computational resources concerned with Ethical Hacking including Computer Systems and Mobile Phones and the IoT devices. He explained how the Hackers may apply the conventionally applied techniques to IoT devices.

About The Training Program:

Formal communication also known as Workplace Communication typically refers to an official interchange of information. Regardless of your role within an organization, knowing how to formally communicate and recognize formal communication can help improve the way you communicate with colleagues and the company's management. Understanding and using all types of formal communication can be a valuable skill, but it requires research and practice. It is an exchange of official information between people within the same organization who are often at different levels within the organizational hierarchy. Formal communication includes a top-down and down-top structure to send various messages and instructions to lower and upper level individuals.

Report on the Training Program:

In order to strengthen the **Work Place Communication Skills** among the Non-Teaching Staff, the Department of Basic Sciences & Humanities conducted a **One Day Training Program** on the topic **Formal Communication & Office Correspondence** to Non-teaching Staff on 23-04-2022 in BLOCK-7 Seminar Hall. Resource persons Dr. V. Radha Devi, Dr. K Kishore Varma and Mr. G. Srinivas Kumar of English Department of the college delivered their Lectures on the subject. Around 25 Non-teaching staff members have attended with enthusiasm and got benefitted by the lectures delivered by the resource persons. The program was conducted for achieving the following objectives:

The program outcomes:

- The participants are expected to understand different types of office communication
- They need to Understand how to communicate clearly in workplaces.
- They have to learn the basics of office vocabulary and fundamental grammar rules
- The Non-teaching staff are supposed to know simple and clear English Language Expressions
- After acquiring the sufficient knowledge of business communication they have to communicate effectively with their colleagues, students and the customers.

The program is organized in Three Sessions to teach variety of topics by different Resource persons. In the First Session of the event, Dr. V Radha Devi Associate Professor in English has explained the importance of Workplace Communication and also described different methods of office communication using the PPT tool and Graphical Presentations.

In the second session Dr. K Kishore Varma Associate Professor in English has discussed the difference between complex vocabulary and simple vocabulary for clear office correspondence and also explained easy tips for enriching vocabulary.

In the final session, Mr. G Srinivas Kumar Asst. Professor in English has explained various models of office correspondence with some examples and illustrations. The program was coordinated by Dr. K Kishore Varma Associate Professor.

Formal Communication Skills

Formal Communication

- ▶ *Formal communication is communication that flows along the lines of management or authority.*

- ▶ *Formal communication takes the shape of manual forms, reports and meetings.*

FORMAL vs **INFORMAL**

Formal communication is divided into Three parts.

- 1. Downward communication** - where information moves from higher management to employees
- 2. Upward communication** - where information moves from employees to higher management
- 3. Horizontal communication** - where information is shared between peers.

Office Communication Vocabulary

Why is the right use of words and phrases important in business?

In an office situation the employees have use right words to communicates a particular piece of information. However, when the words fall short, and our projects are at risk of failure, the importance of proper business communication quickly comes to light.

They need to make right choice of words and phrases for effective communication. Wrong communication can create problems in office administration. Use of high sounding words and indirect expressions must be avoided. The information can be conveyed in simple words and phrases

One week online FDP ON

Education-4.0 Digital Teaching and Learning

From: 31-08-2020 to 04-09-2020.

Organized by Civil Engineering Department

Chief Patron : Dr. G. Madhu Kumar, Secretary and Correspondent

Patron : Prof. Deepak Chowdhary, Principle

Convener : Prof. G.T. Naidu, Head of the Department.

About Civil Engineering Department:

The Department of Civil Engineering was established in the year 2010, with an annual intake of 60 students for B. Tech. Program. At present the Department intake for undergraduate (B. Tech.) is 60. The Department has a mix of both experienced and young faculty. Majority of the faculty members actively involve themselves in improving their education qualifications and research works. Faculty and students are encouraged to attend and participate in various seminars, workshops and training programs conducted by various reputed organizations to enhance their knowledge. The management also supports the faculty members with financial assistance to attend workshops, conferences, and seminars.

About The FDP:

Civil Engineering Department has conducted "Faculty Development Program on Education-4.0 Digital Teaching and Learning from 31/8/2020 to 04/09/2020. The objective of the Program is to strengthen the technical skills and also to promote the participating and organizing skills in the faculty from various universities and institutions. The world community is experiencing plenty of construction activity for infrastructure including Buildings, Railways, Reservoirs, and Dams etc. Beside this, engineers are working on interdisciplinary areas. Their characterization and utilization of new innovations in construction field also cause the evaluation and advancement of various numerical methods. In this aspect we made an opportunity to conduct this faculty development program which helps the faculty, research scholars to have an interaction with high profile personalities from institutions all over India.

ABOUT THE INSTITUTION

Dr.Lankapalli Bullayya College is an affiliated college of Andhra University, established in 1973, named in honour of Dr.Lankapalli Bullayya who served as a Vice-Chancellor of Andhra University. The college campus is located in Resapuvanipalem, Visakhapatnam, Andhra Pradesh. The college was awarded 'A' grade by NAAC.

Society for Collegiate Education also started a Junior College in 1979 and a College of Engineering for Women in 2010, from 2020-21, the College is a co-education institute.

A wide variety of courses were added gradually and currently the college offers both Undergraduate as well as Postgraduate Courses in the facilities of Commerce, Management, Arts and Sciences. In addition to these courses, the college is also granted the status of Research Centre in some departments by Andhra University allowing students to pursue their M.Phil and Doctoral programmes.

Courses offered

Civil Engineering	- 60
Computer Science Engg.	- 120
Electronics and Communication Engg.-	120
Electrical and Electronics Engg.	- 60

ABOUT THE DEPARTMENT

The Department of Civil Engineering was established in the year 2010 with a vision of providing quality education in Civil Engineering. The Department is fully equipped with the state of art laboratories and has well experienced and highly qualified faculty members. The Department offers B.Tech programme with an intake of 60 students. Over the last 7 years, 361 students graduated and most of them were placed in state, central and reputed private organizations.

Organized by
DEPARTMENT OF CIVIL ENGINEERING

**DR.LANKAPALLI BULLAYYA COLLEGE OF
ENGINEERING**
AFFILIATED TO ANDHRA UNIVERSITY (A)
New Resapuvanipalem, Visakhapatnam - 13

ABOUT THE PROGRAM

The program will be an overview of recent advancements in online Teaching and Learning (T&L) process through educational technology. The objectives of this programmes are to throw light on effective tools supporting online teaching and ways to enhance student's engagement with the content being delivered. Brief overview of sessions and the knowledge deliverables of educational technology and its applications are mentioned below.

Learning Management Systems (LMS): Free and open LMS platforms for educators to make a move from traditional to online. LMS have various features and add-on to share resource materials, lectures ppt's, online links, videos, quizzes or any educational activity for remote learners.

Authoring of e-learning materials using multimedia: Screen casting & video editing software to record self-recording videos and helpful to edit any open sources videos according to the content of your subject.

Interactive content authoring for e-learning: These free e-tools can turn passive video learning into an interactive learning experience by inserting various interactivity such as quiz, questions etc., during the video playback. Teachers can monitor the statistics by means of various report options, such as how many students have completely viewed the video, how many have answered the questions right etc.

Collaborative learning platforms: These platforms support Personalized quizzes, game-based learning, student feedback and surveys which can turn online classes interactive and collaborative. Student engagement and learning experiences can be enhanced through these platforms.

Day-1 of One week online FDP on Education-4.0 Digital Teaching and Learning

The outbreak of COVID-19 and recent advancements in online Teaching and Learning (T&L) process via educational technology have progressed the significance of using various Free and Open Source Software (FOSS) tools. In the current scenario the implementation of e-tools in T&L is extremely important. Based on our personal discussions and further upon your invitation we can extend our support to deliver free Faculty Development Programme/Webinar/Workshop to the academic/teaching staff of Dr. Lankapalli Bullayya College of Engineering (for Women), Visakhapatnam, Andhra Pradesh, India. The rationale is to share our experiences on Flipped Teaching Methodology, Student Centric Approaches and majorly to exhibit the impact of technology for enhancing students' performance.

The rationale of this proposal is to share our experiences on Flipped Teaching Methodology, Student Centric Approaches and majorly to exhibit the impact of technology for enhancing students' performance. The session will provide an overview and hands on practice regarding various online platforms. The objectives of this programme are to throw light on effective FOSS tools supporting online teaching and ways to enhance student's engagement with the content being delivered.

Implementation Strategy

The Team shared their expertise in the respective session in general through free online platforms. Nowhere MEC portal, in house platforms or add-ons will neither be presented nor shared with participants. The content will solely Free and Open Source Software (FOSS) tools. After approval from the Deans council communication will be made to the requested organisations and will schedule these sessions as Webinars or Faculty Development Programmes according to the feasibility, mutual concern and approvals from respective managements of both institutions. Brief overview of sessions and the knowledge deliverables of educational technology and its applications are mentioned below

Learning Management Systems (LMS):

The session will be focused on free and open LMS platforms which supports educators to make a move from traditional to online. LMS have various features and add-on to share resource materials, lectures ppt's, online links, videos, quizzes or any educational activity for remote learners.

Major topics of the session are mentioned below:

Introduction to LMS. What is LMS?

What are the benefits of implementing LMS as platform for knowledge exchange in campus? Examples of various LMS – Moodle, Canvas, Edmodo etc. (Free and Paid)

Introduction to Moodle LMS, Basic features of Moodle.

Sharing of Teaching and Learning Materials on Moodle, Conduct of Activities on Moodle Moodle based Assessments and Various plugins (to support additional tasks).

For various educational institutions around the world, the COVID-19 has introduced an adaptive and transformable challenge. Educators are looking for remote classes and ways to improve online teaching and learning to ensure that the learning continues in spite of the current pandemic situation. On this account, recent advancements in online Teaching and Learning (T&L) process via educational technology have progressed the significance of using various Free and Open Source Software (FOSS) tools. In the current scenario the implementation of e-tools in T&L is extremely important.

Authoring of e-learning materials using multimedia

By,
Mr. Vikas Rao Naidu
Mr. Chiranjeevi Rahul

The session will cover various tools to develop interactive video lessons. This workshop/webinar will cover FOUR tools (Vizia, Edpuzzle, Playposit, TedEd) which can turn any passive video learning into an interactive learning experience. Using these tools, we can convert any self-recorded or online video into an active learning video by inserting various interactivity such as quiz, questions etc., during the video playback. This tool can be used even for the videos referred to YouTube. Further, teachers can see the statistics by means of various report options, such as how many students have completely viewed the video, how many have answered the questions right etc.

Report on

One week online FDP ON

Recent trends and Innovations in civil Engineering

From: 27-07-2020 to 31-07-2020.

Organized by

Civil Engineering Department

About Civil Engineering Department:

The Department of Civil Engineering was established in the year 2010, with an annual intake of 60 students for B.Tech. Program. At present the Department intake for undergraduate (B.Tech.) is 60. The Department has a mix of both experienced and young faculty. Majority of the faculty members actively involve themselves in improving their education qualifications and research works. Faculty and students are encouraged to attend and participate in various seminars, workshops and training programs conducted by various reputed organizations to enhance their knowledge. The management also supports the faculty members with financial assistance to attend workshops, conferences, and seminars.

About The FDP:

Civil Engineering Department has conducted "Faculty Development Programme" from 27/7/2023 to 31/7/2023. The objective of the Programme is to strengthen the technical skills and also to promote the participating and organizing skills in the faculty from various institutions.

Brochure for One week online FDP on Recent trends and Innovations in civil Engineering

ABOUT THE INSTITUTION

Dr.Lankapalli Bullayya College is an affiliated college of Andhra University, established in 1973, named in honour of Dr.Lankapalli Bullayya who served as a Vice-Chancellor of Andhra University. The college campus is located in Resapuvanipalem, Visakhapatnam, Andhra Pradesh. The college was awarded 'A' grade by NAAC.

Society for Collegiate Education also started a Junior College in 1979 and a College of Engineering for Women in 2010, from 2020-21, the College will be a co-education institute.

A wide variety of courses were added gradually and currently the college offers both Undergraduate as well as Postgraduate Courses in the faculty of Commerce, Management, Arts and Sciences. In addition to these courses, the college is also granted the status of Research Centre in some departments by Andhra University allowing students to pursue their M.Phil and Doctoral programmes.

Courses offered	
Civil Engineering	- 60
Computer Science Engg.	- 120
Electronics and Communication Engg.-	120

ABOUT THE DEPARTMENT

The Department of Civil Engineering was established in the year 2010 with a vision of providing quality education in Civil Engineering. The Department is fully equipped with the state of art laboratories and has well experienced and highly qualified faculty members. The Department offers B.Tech programme with an intake of 60 students. Over the last 7 years, 361 students graduated and most of them were placed in state, central and reputed private organizations.

ABOUT THE PROGRAM

The world community is experiencing plenty of construction activities for infrastructure including High Rise Buildings, Airports, Stadiums, Railways, Bridges, Reservoirs, Dams, Tunnels etc. Besides this, engineers are working on interdisciplinary areas of naval and aerospace engineering. The global research community is working towards new innovations including New Emergent Materials, Generative Design, Laser Scanning, Point Clouds, 3D Printing, Robotic Prefabrication, Self Healing Concrete, Thermal Bridging, Kinetic Roads etc. Their characterization and utilization of new innovations in construction fields also caused the evolution and advancement of various numerical methods. Therefore, it made an important factor to the students, faculty, research institutions and industrial engineers to know about recent innovations across the world. In this aspect, we made an opportunity to conduct this FDP to enable the research scholars, faculty and industrial engineers to have an interaction with high profile personalities from various institutions across India.

Prof. G. Appa Rao
Professor of Civil Engineering
IIT- MADRAS

27-07-2020
7:00 PM - 8:00 PM

Resource person Prof G.APPA RAO Garu has briefly discussed about Precast Construction and Fastening Techniques

Precast concrete is a construction product produced by casting concrete in a reusable mold or form which is then cured in a controlled environment, transported to the construction site and lifted into place. It is an alternative to *cast-in-situ* concrete. While cast-in-situ concrete is cast in its actual location, precast concrete is cast at another location, either at the building site or in a factory, and is then lifted to its final resting place and fixed securely. This means that unlike cast-in-situ construction, which is monolithic or continuous, precast concrete buildings are made of separate pieces that are bolted or connected together.

He had given various inputs to the participants regarding precast construction.

- Fine Aggregate (M-sand?)*
- Coarse Aggregate (Artificial?)*
- Admixtures (surfact?)*

**Metamorphosis of Civil Engineering:
Embracing Emerging Technologies**

Prof. K.V.G.D. Balaji
Professor & Registrar
GITAM University

28-07-2020
11:00 am - 12:00 noon

Resource person Prof K.V.G.D. Balaji Garu has briefly discussed about Metamorphosis of Civil Engineering Embracing Emerging Technologies

The construction industry, traditionally viewed as slow to adopt new technologies, is undergoing a radical transformation. This metamorphosis is driven by the integration of advanced technologies that are reshaping the way subcontractors operate, enhancing efficiency, safety, and productivity. This article explores the various ways technology is revolutionizing the construction industry and the implications for subcontractors. He had given various inputs to the participants regarding precast construction.

Day-3 Schedule:

Resource person Prof C.N.V.Satyanarayana Garu has briefly discussed about Forensic geotechnical investigation with a case study.

Forensic Geotechnical Engineering involves analysis of a project, site conditions, or construction from a geotechnical standpoint. These analyses can be performed during the design phase of a project to check the calculations and engineering assumptions or during and/or after the construction of a project to provide quality assurance or address issues that arise during or after construction. Common issues that may arise that a forensic geotechnical analysis can help with include:

- Expansive Soils
- Collapsible Soils
- Settlement of Shallow and Deep Compacted Fill Soils
- Moisture Intrusion Below Slabs
- Soil Corrosion
- Sulfate Exposure
- Site Runoff and Drainage
- Roadway and Parking Area Pavement Failures

He had given various inputs to the participants regarding precast construction.

Forensic Geotechnical Engineering deals with the investigation/ analysis of geotechnical/soil related failures of the structures that occur during/after construction.

The forensic study is carried out to

- identify distress in the structure
- the cause of failure and
- suggest suitable remedial technique for rectification of the problem/failure.

Prof. Vazeer Mohammad
Professor of Civil Engineering
Andhra University

30-07-2020
11:00 am - 12:00 noon

Resource person Prof Vazeer mohammad Garu has briefly discussed about Geomatics of civil Engineering

Geomatics engineers manage global geospatial resources and infrastructure. They design, develop, and operate systems for collecting, analyzing, and utilizing geospatial information about the land, infrastructure, the oceans, natural resources, and the environment.

In Civil Engineering's Geomatics Engineering emphasis area, you will have the opportunity to study property boundary determination, digital mapping, geodesy, geographic information systems (GIS), global positioning systems (GPS), land information management, photogrammetry, and remote sensing. The Geomatics faculty are dedicated to effective teaching and cutting-edge research.

He had given various inputs to the participants regarding precast construction.

Geomatics Tools & Techniques

Includes the tools & techniques used in land surveying, remote sensing (LiDAR, UAV), cartography, GIS, GPS/ GLONASS/ Galileo/Compass, photogrammetry, geography and related forms of Earth mapping. It is an accurate, timely and cost-effective tool used for measurement analysis and visualization of phenomena on Earth surface.

Road accident is most unwanted thing to happen to a road user, though they happen quite often. The most unfortunate thing is that we don't learn from our

- 1.Over Speeding
- 2.Drunken Driving
- 3.Distractions to Driver
- 4.Red Light Jumping
- 5.Avoiding Safety Gears like Seat belts and Helmets
- 6.Non-adherence to lane driving and overtaking in a wrong manner

Various national and international researchers have found these as most common behavior of Road drivers, which leads to accidents.

Session-1:

Organizational Behavior and Motivation Skills

The training program was started on 5-12-2020 with a session by Mr. S.M. Rehman, Vice Principal, Dr. Lankapalli Bullayya College of Engineering. Who introduced the key concepts of the “Organizational Behavior”, explained the importance of learning the objectives of organizational behavior by teachers in general and technical teachers in particular. At the end of the session the questions and queries raised by the staff were clarified by the resource persons.

Session-2:

Communication Skills and Human Resource Management

Important and interesting session was taken by Mr.S.M.Rehman, Vice Principal, Dr.Lankapalli Bullayya College of Engineering dealt with the significance of "Communication Skills". He explained and correlated the importance of communication skills specially to enhance the classroom environment. And also delivered an extraordinary lecture on "Human Resource Management". He summarized all the key aspects of H R Management amplifying the importance of the human resources in an organization and its effective management.

Staff members form the backbone of an educational institution. In the staff some may not be directly involved in classroom instruction, their roles are instrumental in supporting the institution's daily operations and contributing to its overall effectiveness. Effective communication skills among All-teaching staff members are essential for promoting a positive work environment, enhancing productivity, and ensuring the smooth functioning of the organization.

Session-3

Total Quality Management and Stress Management

Mr.S.M.Rehman, Vice Principal, Dr.LankapalliBullayya College of Engineering Took a session on “Total Quality Management” He explained the importance of quality in an organization for its institutional growth and development. He also dealt with the concept of “Stress Management”. Stated various reasons that made us feel under stress. He highlighted how the stressors influence and lead to have the physiological and the psychological problems by the individuals.

The stress management training program represents a proactive step in promoting the well-being of all staff members. By providing them with the knowledge and tools to manage stress effectively, we aim to create a healthier, more resilient workforce capable of navigating the challenges of the modern workplace.

About the Institute:

Dr. Lankapalli Bullayya College of Engineering for Womens encourages and promotes education and keeps its focus on empowerment and their personality development with which they can face the challenges of modern world. The broad objective of the institution is to provide the right opportunities to students for learning the higher skills in new technologies and building their extraordinary careers in industry and research organizations.

Acclaimed by the student community as an outstanding women engineering college in the smart city Visakhapatnam, Andhra Pradesh, Dr. Lankapalli Bullayya College of Engineering (for women), was established by The Society for Collegiate Education in 2010 with the objective to produce technologists and scientists who would engage in research, design and development to help building the nation. Our Campus is ideally located in the heart of the city on 10 acre land.

The curriculum places emphasis on basic topics in engineering sciences, design and experimental methods. The College's faculty and staff strive hard with their limitless potential and technical expertise to create ingenious Engineers.

About the EEE Department:

The Department of Electrical & Electronics Engineering was established in 2010-2011. The department offers a four year degree program Admission process is through state- wide entrance examination i.e EAMCET. The department is resourceful in terms of infrastructure and state-of-the-art facilities to pursue academic education and research in niche areas of technology. Liberal funding from the college management has enabled the Department to acquire specialized research facilities. The highly qualified and experienced faculty in adequate strength with zero attrition rates is one of the most significant features of the department. Electrical & Electronics Engineering is an enlightening branch which requires overall peripheral knowledge about all other branches and in-depth knowledge of Electrical & Electronics Engineering.

Department of Electrical and Electronics Engineering

(04-11-2019 to 08-11-2019)

Theme of the Event:

This faculty development program (FDP) on MATLAB Programming and its applications in engineering is a training program designed to update the knowledge and skills of faculty members in the field of engineering. The program is intended to equip faculty with the latest information, tools, and techniques that they can use in their teaching, research, and professional activities.

The FDP on MATLAB Programming and its applications in engineering would cover a range of topics related to the latest developments and advancements in the field. The FDP could include a combination of lectures that would provide participants with data preprocessing, model training and evaluation using MATLAB. The program could also provide participants with opportunities to network with other faculty members, industry experts, and researchers.

Dr. Lankapalli Bullayya College of Engineering (For Women)

New Rosapuram Palam, Visakhapatnam

Sponsored by Society of College Education

Approved by AICTE, Affiliated to Andhra University

One week Faculty Development Programme on "MATLAB Programming and it's applications in Engineering"

Organized by

Department of Electrical and Electronics Engineering
(04-11-2019 to 08-11-2019)

Schedule of the Program:

Date	Session1	Session2	Session3
04-11-2019 (Monday)	Basics of MATLAB (AG)	Programming Constructs, Functions (DM)	Matrix, Arrays, Vectors, and Image Processing Toolbox (JB)
05-11-2019 (Tuesday)	Medical Image Analysis (SJG)	Medical Image Analysis (SJG)	Deployment of Sensor Network and WSN Applications (GVK)
06-11-2019 (Wednesday)	2D, 3D Plotting and Graphics in MATLAB, Differential Equations and Polynomial (BSK)	Soft Computing Approaches and Genetic Algorithm Implementation (GVK)	Epileptic Seizure Detection using Soft Computing (AG)
07-11-2019 (Thursday)	Numerical, Statistical and Exploratory Data Analysis using MATLAB (KAG)	Bio-Informatics Data Analytics, Biological Datasets Processing and Optimization Techniques (SJG)	Artificial Neural Networks (ANN), Fetching Real Time Streaming Data from Twitter using MATLAB (DM)
08-11-2019 (Friday)	Dynamic GUI based Models using Simulink (KVR)	Simulink for Engineering and Scientific Applications (DDC)	Simulink for Engineering and Scientific Applications (DDC)

S.no	Name of the Speaker	Designation
1	Dr. J Babu (JB)	Professor, Dadi Institute of Engineering & Technology, Anakapalle
2	Mr.K.V.Ramana Rao (KVR)	Associate Professor, Vignan's Institute of Engineering for Women, Visakhapatnam
3	Mrs. K. Adi Ganeswari (KAG)	Assistant Professor, Sai Ganapathi Engineering College, Visakhapatnam
4	Mr. B Sangeeth Kumar (BSK)	Assistant Professor, SVP College of Engineering, Visakhapatnam
5	Dr.D.Deepak Chowdary (DDC)	Principal, Dr. Lankapalli Bullayya college of Engineering (for Women)
6	Dr.Anand Gondesi (AG)	HOD Electrical and Electronics Engineering, Dr. Lankapalli Bullayya college of Engineering (for Women)
7	Prof.D.Madhavi (DM)	HOD Computer Science Engineering, Dr. Lankapalli Bullayya college of Engineering (for Women)
8	Dr.Soloman JV Gotham (SJG)	HOD Electronics and Communication Engineering, Dr. L. Bullayya college of Engineering (for Women)
9	Dr.G.Vamsi Krishna (GVK)	Asst Professor, Dr. Lankapalli Bullayya college of Engineering (for Women)

About The Training program:

Electrical and Electronics Engineering Department has conducted "Training Program" on 21-12-2019. The objective of the Program is to perform various tasks such as data entry, analysis, visualization skills in the Staff.

- The program outcomes:
- Demonstrate the basic mechanics and navigation of an Excel spreadsheet
- Format data and cells using different techniques
- Construct Formulas
- Create and modify charts to display data in a graphical way
- Preview and print worksheets according to the desired layout
- Use the Excel online help feature to find answers to questions
- Enter and organize data in Ms Excel and interpret the statistical results
- Analyze data using Pivot tables and pivot charts

The program was co-ordinated by Mr. B. Satish Naidu Asst. Professor of Department of Electrical and Electronics Engineering

Session-I :

Formulas and Functions

Mr.Ch. Arun Kumar, Assistant Professor of EEE is delivering the session

The training programme was started on 21-12-2019 by Mr.Ch. Arun Kumar, Assistant Professor of EEE, Dr.Lankapalli Bullayya College of Engineering for Women. Explained the key formulae used in "Microsoft Excel", explained the importance how Microsoft Excel enables users to format, organize and calculate data in a spreadsheet. At the end of the session the questions and queries raised by the staff were clarified by the resource person.

Session-2:

Display data in a Graphical way

Mr.Ch. Arun Kumar, Assistant Professor of EEE is delivering the session

Important and interesting session was taken by Mr.Ch. Arun Kumar, Assistant Professor, Dr.Lankapalli Bullayya College of Engineering for Women dealt with the significance of "Ms Excel". He explained and correlated how the data has be arranged according to our requirement.

Mainly taught about how to the grab the required data from the spreadsheet with in a short period and time. Explained about how to analyze the data easily by looking through the spreadsheet. In this section mainly concentrated about how to Display the data in a graphical way so that we can study the data by looking through the graph very easily.

Session-3

Tables and Pivot tables

Mr.Ch. Arun Kumar, Assistant Professor of EEE is delivering the session

Mr.Ch.Arun Kumar, Assistant Professor, Dr.Lankapalli Bullayya College of Engineering for Women Took a session on “Tables and Pivot Tables” He explained the importance of using those tables . Explained how to import and enter the data in a spreadsheet and it must be converted in Pivot tables. Explained clearly about how much time we can save by using those tables.

In this section explained about the how to use calculated columns to perform operations on existing columns, Drag and drop fields to the Rows, Columns, Values, or Filters area, Format numbers, apply conditional formatting, and adjust other formatting options, how to Represent your data visually by creating pivot charts based on your pivot table. At the end of the session queries was solved.

About the Institute:

Dr. Lankapalli Bullayya College of Engineering women's encourages and promotes education and keeps its focus on empowerment and their personality development with which they can face the challenges of modern world. The broad objective of the institution is to provide the right opportunities to students for learning the higher skills in new technologies and building their extraordinary careers in industry and research organizations.

Acclaimed by the student community as an outstanding women engineering college in the smart city Visakhapatnam, Andhra Pradesh, Dr. Lankapalli Bullayya College of Engineering (for women), was established by The Society for Collegiate Education in 2010 with the objective to produce technologists and scientists who would engage in research, design and development to help building the nation. Our Campus is ideally located in the heart of the city on 10 acre land.

The curriculum places emphasis on basic topics in engineering sciences, design and experimental methods. The College's faculty and staff strive hard with their limitless potential and technical expertise to create ingenious Engineers.

About the CSE Department:

The Department of Computer Science Engineering was established in 2010-2011. The department offers a four year degree program Admission process is through state- wide entrance examination i.e EAMCET. The department is resourceful in terms of infrastructure and state-of-the-art facilities to pursue academic education and research in niche areas of technology. Liberal funding from the college management has enabled the Department to acquire specialized research facilities. The highly qualified and experienced faculty in adequate strength with zero attrition rates is one of the most significant features of the department. Computer Science Engineering is an enlightening branch which requires overall peripheral knowledge about all other branches and in-depth knowledge of Computer Science Engineering.

Theme of the Event:

This faculty development program (FDP) on recent trends in Internet of Things is a training program designed to update the knowledge and skills of faculty members in the field of Computer Science engineering. The program is intended to equip faculty members with the information, tools, and techniques that they can use in their teaching, research, and professional activities.

The FDP on recent trends in Internet of Things would cover a range of topics related to the latest developments and advancements in the field. The FDP could include a combination of lectures that would provide participants with a comprehensive understanding of the latest trends in Computer engineering. The program could also provide participants with electrical opportunities to network with other faculty members, industry experts, and researchers in the field.

About the Institute

Dr. Lankapalli Bullayya College of Engineering (DLBCE) is a private college located in Visakhapatnam, Andhra Pradesh, INDIA. It was established as Women's college in the year 2010 and later converted to co-education in the year 2020. The college is affiliated with Andhra University (AU), Visakhapatnam. DLBCE is dedicated to providing high-quality technical education. The college offers undergraduate courses in various disciplines of engineering, including Computer Science and Engineering, Electronics and Communication Engineering, Electrical and Electronics Engineering and Civil Engineering. The curriculum is designed to equip students with the skills and knowledge required to meet the challenges of the rapidly changing technological landscape. DLBCE is committed to empowering students through education and creating a pipeline of skilled and confident engineers who can contribute to the development of the country.

Day-3: 31-10-2018 Intrusion Detection based on Internet of things.

Jinto P Joy, Project Technician, CDAC Bangalore

Intrusion Detection Systems (IDS) based on the Internet of Things (IoT) have emerged as crucial elements in ensuring the security of interconnected devices and networks. Leveraging IoT technology, these systems employ a network of sensors and intelligent algorithms to monitor and detect unauthorized access or malicious activities. IoT-enabled IDS enhances security by continuously analysing data from various devices and endpoints. It can identify abnormal patterns, unauthorized access attempts, or anomalies in the behaviour of connected devices, triggering alerts for prompt intervention. The interconnected nature of IoT allows for real-time communication between devices, enabling rapid responses to potential security threats. This dynamic and adaptive approach strengthens the overall cybersecurity posture, particularly in complex and evolving IoT environments.

Day- 4:01-11-2018 Intelligent Traffic information based on Internet of things

VELMURUGAN R, Project Technician, CDAC, Bangalore

Intelligent Traffic Information (ITI) powered by the Internet of Things (IoT) is revolutionizing urban mobility. Through a network of smart sensors and devices, ITI collects real-time data on traffic conditions, enabling cities to make informed decisions for efficient traffic management. IoT facilitates seamless communication between traffic infrastructure elements, allowing for dynamic adjustments to signals and signs based on live data. This connectivity ensures swift responses to changing traffic patterns and helps in preventing congestion. Analysing the gathered data in real time, ITI identifies traffic trends, predicts congestion, and provides valuable insights for authorities. Mobile applications integrated with IoT offer citizen's real-time traffic updates and personalized route suggestions, Improving their commuting experience.

Day-1: 29-10-2018 Bluetooth, Wifi Sensor Networks on IOT

Mr.Dwarakanath, Project Engineer, CDAC, Bangalore

Bluetooth and Wi-Fi sensor networks are integral components of the Internet of Things (IoT), enabling seamless communication and data exchange among connected devices. Bluetooth, known for its low-power consumption and short-range connectivity, is ideal for connecting IoT devices in close proximity, such as within a smart home or office environment. Wi-Fi, with its higher bandwidth and longer range, facilitates broader connectivity and data transfer in IoT applications across larger spaces, such as smart cities or industrial settings. Together, Bluetooth and Wi-Fi sensor networks provide a versatile infrastructure for diverse IoT ecosystems.

Day-2: 30-10-2018 Wireless Sensor Networks covering a Plethora of experiments

Mr.Gokul Krishnan, Project engineer R&D Division, CDAC Bangalore.

In the past couple of decades, wireless communications have expanded at an extraordinary rate, permeating every environment. The M2M paradigm is generally referred to by the more common term of the Internet of things (IoT), and both terms are sometimes used interchangeably. The IoT is generally described as a system of interconnected objects (things) that are capable of communicating with each other over the Internet without human active intervention. A key infrastructure that provides support to the IoT paradigm is wireless sensor networks (WSNs).

Day-5: 02-11-2018 Raspberry pi Based Smart Supervisor using Internet of Things (IoT)

Mr.Dwarakanath, Project engineer, CDAC Bangalore

A Raspberry Pi-based Smart Supervisor utilizing the Internet of Things (IoT) is a powerful innovation that combines the versatility of Raspberry Pi and the connectivity of IoT for enhanced supervisory control. This system employs the compact and affordable Raspberry Pi as a central processing unit, capable of running various applications and programs. Integrated with IoT, the Smart Supervisor can remotely monitor and manage a multitude of devices and processes in real time. This connectivity allows for instant data collection, analysis, and decision-making, improving overall efficiency and responsiveness. The Smart Supervisor, powered by Raspberry Pi and IoT, finds applications in diverse fields, from industrial settings for monitoring machinery to smart homes for controlling appliances. It serves as a cost-effective solution for creating intelligent and connected environments.

Day-6:03-11-2018 Internet of Things based Controlling of Appliances using GSM/GPRS

MR. Gokul Krishnan, Project engineer R&D Division, CDAC Bangalore

The internet has initially started as the "Internet Of Computers", a global network enabling services that now include the World Wide Web(WWW), File Transfer Protocol and others allowing computers and hence users to communicate with each other and exchange information. There are several definitions for the Internet of Things (IOT) that explain what are the main functionalities of it and what we should expect from when connecting "Things" with each other and with the internet. Internet of Things (IoT) is an ideal emerging technology to influence the internet and communication technologies.

CIRCULAR

The department of Basic Sciences and Humanities is organizing a Five Day Faculty Development Program on "Advances In Physical Sciences and their Applications in Engineering" from 23-07-2018 to 27-07-2018. The FDP will be delivered by Eminent Speakers.

Hence all the Faculty Members are informed to attend the program without fail.

Venue: Seminar Hall, Block-7.

Co-Ordinators: Prof. G.Lokeswara Reddy.

PROGRAM REPORT

Name of the program: Five day FDP on Advances in Physical Sciences and their Applications in Engineering

Organized by : Department of Basic Science and Humanities

Date: 23-07-18 to 27-07-18

Co-ordinators: Prof. G.Lokeswara Reddy

HOD, Department of BS&H

Dr.L.B.College of Engineering(for women), Visakhapatnam

Dr.B.Rama Rao

Associate Professor,

Department of BS&H

Dr.L.B.College of Engineering(for women), Visakhapatnam

Total number of participants: 29

Objective:

The primary aim of the Faculty Development Program (FDP) is to augment Teachers' current understanding of the concepts in Engineering Physics and Engineering Chemistry. The objective of the FDP is to give specific inputs relating to topics such as Chemistry and water technology, Redox reactions in battery technology, Polymer Electrolytes for Fuel cells, Catalysis for sustainability of green chemistry, Electromagnetic Boundary conditions, Hall Effect and its applications, Synthesis of Nonmaterial's, Superconductivity – Perfect Electrical Conductivity and Perfect Diamagnetism. The program will mostly cover the syllabus for Engineering Physics and Engineering Chemistry. The FDP will be a forum for discussion amongst teachers of Physics and chemistry from the different colleges.

About the FDP:

The faculty Development Program is organised with a vision to enhance the fundamental and advanced topics of Physics and chemistry which plays a vital role in making the roots of education stronger. This program is about "ADVANCES IN PHYSICAL SCIENCES AND THEIR APPLICATIONS IN ENGINEERING" 23rd - 27th July 2018 was conducted in association with the Department of Basic Sciences and Humanities, Dr. Lankapalli Bullayya College of Engineering (For Women), VISAKHAPATNAM. All the sessions were very much informative. The discussed areas are of great benefit for the participants as the topics match with the current working domain. Participants were enlightened with the most widely used advance technologies in this domain.

Prof.G.Lokeswara Reddy, Professor of Chemistry, delivering lecture on Nano Chemistry

Mrs. V.Subba Lakshmi, Assistant Professor of Chemistry, delivering lecture on Redox Reactions in Battery Technology

Dr.D.Mallika, Assistant Professor of Chemistry, delivering lecture on Advanced Materials for Fuel Cells

Mrs.L.Uma Tulasi, Assistant Professor of Chemistry, delivering lecture on Catalysis For Sustainability Of Green Chemistry

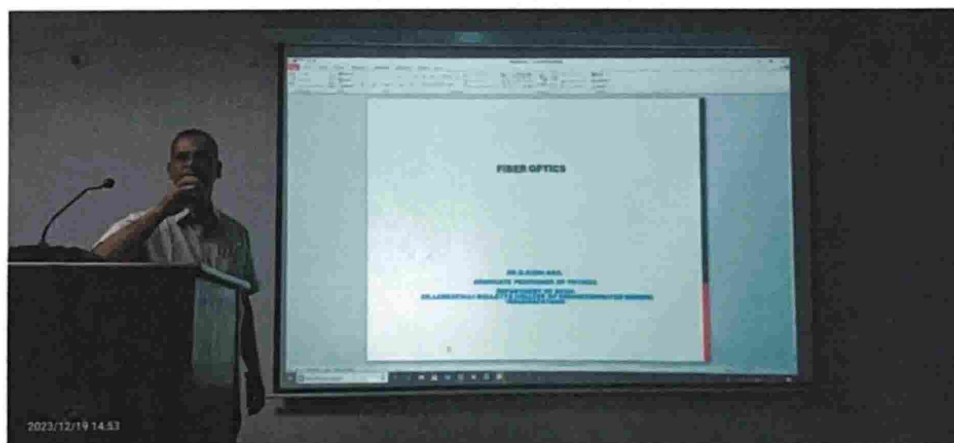

Dr.B.Rama Rao, Associate Professor of Physics, delivering lecture on Superconductivity – Perfect Electrical Conductivity and Perfect Diamagnetism

Mr.D.Deenabandhu, Assistant Professor of Physics, delivering lecture on Quantum Computing

Mrs. S. Sivajyothi, Assistant Professor of Physics, delivering lecture on Synthesis of Nano Materials

Dr. B. Rama Rao, Associate Professor of Physics, delivering lecture on Fiber Optics

Dr.S.V.J.S.S.Rajesh, Assistant Professor of Physics, delivering lecture on Hall Effect and its applications
