FIVE WEEKS ADD-ON PROGRAM ON EXCELLING DATA VISUALIZATION WITH TABLEAU is an intensive and specialized educational initiative designed to empower participants with advanced knowledge and practical skills in data visualization using Tableau, a leading data visualization tool. The program spans five weeks and focuses on the mastery of data visualization techniques, best practices, and real-world applications.

DATA VISUALIZATION COURSE OBJECTIVES

- Proficiency in Tableau usage
- Understanding of data visualization principles.
- Data preparation and integration skills.
- Advanced chart creation expertise
- Interactive dashboard creation capability.
- Geospatial and time-series visualization knowledge
- Data storytelling proficiency
- Application of data-driven decision-making
- Real-world application of Tableau
- Awareness of data security and ethics.
- Collaboration and sharing in Tableau.

COURSE OUTCOME

- Advanced Tableau proficiency.
- Expertise in data visualization principles.
- Skills in data preparation and integration.
- Proficiency in diverse chart creation
- Capability to create interactive dashboards
- Proficiency in geospatial and time-series visualization
- Mastery of data storytelling
- Application of data-driven decision-making
- Real-world application of Tableau
- Awareness of data security and ethics.
- Proficiency in collaboration and sharing using Tableau.

TABLE OF CONTENTS OUTLINE

- Introduction to Tableau
- Data Import and Preparation
- Data Visualization Fundamentals
- Tableau Dashboards
- Advanced Tableau Features
- Data Connection and Integration
- Tableau Server and Sharing
- Data Storytelling
- Data Analytics with Tableau
- Real-World Projects
- Best Practices and Optimization
- Certification Preparation

Report on FIVE WEEKS ADD-ON PROGRAM ON EXCELLING DATA VISUALIZATION WITH TABLEAU

Duration: 25-7-2022 to 31-8-2022

The Five Weeks Add-On Program on Excelling Data Visualization with Tableau is a comprehensive training initiative designed to enhance participants' skills in the field of data visualization using the powerful tool, Tableau. This program aims to provide hands-on experience and practical knowledge to enable participants to create impactful visualizations that drive insights and decision-making.

Program Overview:

The program spans five weeks, with a carefully curated curriculum that covers fundamental and advanced concepts of data visualization. Participants will engage in a blend of theoretical sessions, hands-on exercises, and real-world case studies to ensure a holistic learning experience. The program fosters a collaborative environment, encouraging participants to share insights and learn from each other.

Duration: Five weeks

Objective:

The primary objective of this program is to equip participants with the skills and knowledge necessary to excel in data visualization using Tableau. By the end of the program, participants should be proficient in creating visually compelling and informative dashboards, interpreting complex data sets, and making data-driven decisions.

Target Audience:

This program is tailored for professionals and enthusiasts seeking to enhance their data visualization skills, including but not limited to analysts, business intelligence professionals, data scientists, and decision-makers. Participants should have a basic understanding of data concepts and a keen interest in leveraging Tableau for effective visualizations.

Number of Students Attended: 131

Details of the Resource Person: 1) Mrs.G.Kavya,
Assistant Professor,
CSE Department,
Dr.Lankapalli Bullayya College of Engineering for Women.

2) Dr.K.Anuradha,
Assistant Professor,
CSE Department,
Dr.Lankapalli Bullayya College of Engineering for Women.

Methodology:

The program employs a blend of instructional methods, including lectures, hands-on practical sessions, and collaborative projects. Each week focuses on specific themes, gradually progressing from basic concepts to advanced techniques. Participants will have access to a virtual learning environment, where they can practice and apply their skills in a controlled setting.

Outcome:

Upon completion of the program, participants can expect to:

- Demonstrate proficiency in using Tableau for data visualization.
- Develop visually appealing and insightful dashboards.
- Interpret and analyze complex data sets effectively.
- Make informed decisions based on data-driven insights.
- Collaborate with peers on data visualization projects.

Conclusion:

The Five Weeks Add-On Program on Excelling Data Visualization with Tableau offers a valuable opportunity for participants to elevate their data visualization skills. The combination of theoretical knowledge, practical exercises, and real-world applications ensures a well-rounded learning experience. As participants apply their newfound skills in their professional roles, the program aims to contribute to improved data-driven decision-making across various industries.

In conclusion, this program serves as a stepping stone for individuals aspiring to excel in the dynamic field of data visualization, empowering them to unlock the full potential of Tableau for impactful storytelling through data.

ABOUT THE ECE DEPARTMENT

The Department of Electronics and Communication Engineering was established in the year 2010 with an annual intake of 120 students for B.Tech Program. The Department has a mix of both experienced and young faculty. All the faculty members actively involve themselves in improving their education qualifications and research works. Faculty and students are encouraged to attend and participate in various seminars, workshops and training programs conducted by various reputed organizations to enhance their knowledge. The management also supports the faculty members with financial assistance to attend workshops, conferences and seminars.

ABOUT THE COURSE

In pursuit of technical education, the department of Electronics and Communication Engineering of Dr.Lankapalli Bullayya College of Engineering have organized the ADD-ON Course on "Two week Add-on program on Aspects of RF Communication" from 12/09/2022 to 24/09/2022, with an objective to develop students practical knowledge with respect to RF Communication. This workshop is organized to provide additional knowledge to the students in addition to the regular curriculum.

Report on

Two-week Add-on Program on Aspects of RF Communication

Duration: 2 WEEKS (12-09-2022 to 24-09-2022)

Resource Person: Razia Begum (Asst. Prof. ECE Dept.)

Course Coordinators: Ms. T. Krishnaveni (Asst. Prof. ECE Dept.)

Mrs. G. Ramalakshmi (Asst. Prof. ECE Dept.)

1. Introduction:

Radio Frequency (RF) communications is a crucial aspect of modern technology and plays a fundamental role in various industries, including telecommunications, broadcasting, aerospace, and military applications. RF communications involve the transmission and reception of electromagnetic signals in the radio frequency spectrum, typically ranging from 3 kHz to 300 GHz.

2. Principles:

The principles underlying RF communications include:

1. **Electromagnetic Waves:** RF signals are electromagnetic waves characterized by their frequency, wavelength, and amplitude. The propagation of these waves occurs through the atmosphere and various transmission media, such as cables or waveguides.
2. **Modulation:** Information is conveyed through RF signals using modulation techniques. Modulation changes one or more characteristics of the carrier signal (e.g., amplitude, frequency, or phase) to encode the information.
3. **Antennas:** Antennas are essential components for both transmitting and receiving RF signals. They convert electrical signals into electromagnetic waves (transmission) and vice versa (reception).

4. **Spectrum Management:** RF communications operate in allocated frequency bands to avoid interference. Regulatory bodies, such as the Federal Communications Commission (FCC) in the United States, govern and allocate these bands.

3. Applications:

RF communications are ubiquitous in various applications:

1. **Wireless Telecommunications:** Mobile phones, Wi-Fi, and cellular networks rely on RF communications to provide voice and data services. **Broadcasting:** Radio and television broadcasting use RF signals to transmit audio and video content to receivers.

3. **Aerospace and Satellite Communications:** RF is crucial for aircraft and spacecraft communication, navigation, and data transmission.

4. **Military and Defense:** RF technology is used for secure communication, radar systems, electronic warfare, and surveillance.

5. **Internet of Things (IoT):** Many IoT devices communicate using RF protocols, enabling connectivity and data exchange among devices.

4. Participation and Feedback:

125

5. Participants Feedback:

Based on the feedback forms collected:

- 80% of participants found the course content relevant and useful.
- 75% appreciated the hands-on experience.
- 20% wanted more emphasis on certain advanced topics, suggesting these could be included in a follow-up course.
- 92% expressed satisfaction with the course instructors' knowledge and teaching methods.

6. Conclusion:

RF communications are the backbone of modern wireless technology, enabling connectivity and information exchange across various sectors. While facing challenges related to interference and spectrum limitations, ongoing research and technological advancements promise a bright future for RF communications with faster, more reliable, and secure connectivity.

About CIVIL Engineering Department:

The Department of Civil Engineering was established in the year 2010, with an annual intake of 60 students for B.Tech. Programme. At present the Department intake for undergraduate (B.Tech.) is 60. The Department has a mix of both experienced and young faculty. Majority of the faculty members actively involve themselves in improving their education qualifications and research works. Faculty and students are encouraged to attend and participate in various seminars, workshops and training programs conducted by various reputed organizations to enhance their knowledge. The management also supports the faculty members with financial assistance to attend workshops, conferences, and seminars.

The Civil Department is well equipped with spacious laboratories and experienced technicians. The department of Civil Engineering also offers various consultancy works.

About The Workshop:

In its pursuit of excellence in technical education The Department of Civil Engineering of Bullayya Engineering college have organized the "Architectural Modeling using Revit Workshop" from 26/09/2022 to 1/10/2022, in Computer Lab of Block 7. With an objective to develop students' practical knowledge with respect to planning and architecture and also to introduce BIM which is Industry 4.0 in Civil Engineering to the students, the "Architectural Modeling using Revit Workshop" has been organized.

**DEPARTMENT OF CIVIL ENGINEERING
(ADD-ON COURSE ON ARCHITECTURAL MODELING USING REVIT REPORT)
26/09/2022 TO 1/10/2022)**

About CIVIL Engineering Department:

The Department of Civil Engineering was established in the year 2010, with an annual intake of 60 students for B.Tech. Programme. At present the Department intake for undergraduate (B.Tech.) is 60. The Department has a mix of both experienced and young faculty. Majority of the faculty members actively involve themselves in improving their education qualifications and research works. Faculty and students are encouraged to attend and participate in various seminars, workshops and training programs conducted by various reputed organizations to enhance their knowledge. The management also supports the faculty members with financial assistance to attend workshops, conferences, and seminars.

The Civil Department is well equipped with spacious laboratories and experienced technicians. The department of Civil Engineering also offers various consultancy works.

About The Workshop:

In its pursuit of excellence in technical education The Department of Civil Engineering of Bullayya Engineering college have organized the "Architectural Modeling using Revit Workshop" from 26/09/2022 to 1/10/2022, in Computer Lab of Block 7. With an objective to develop students' practical knowledge with respect to planning and architecture and also to introduce BIM which is Industry 4.0 in Civil Engineering to the students, the "Architectural Modeling using Revit Workshop" has been organized.

About Autodesk Revit Architecture

Autodesk Revit Architecture is now available to buy as part of the best-selling Autodesk Revit 2019 software solution for BIM and is a single affordable package to cover all the Architectural design needs.

Revit Architecture is Autodesk's BIM software solution for structural engineering companies and structural engineers, that provides a feature rich tool set helping to drive efficient design processes in a BIM (Building Information Modelling) environment, or when working with other construction disciplines using Autodesk CAD software such as Autodesk® Revit® Architecture and Autodesk® Revit® MEP. Autodesk® Revit® Architecture helps typical workflows between initial architectural conceptual designs, through to structural engineering and out to detailed drafting by allowing all parties access to the same project database.

This means that the impact and effect of model changes can be assessed immediately thereby reducing errors as existing documentation and views are updated automatically using Revit's parametric technology saving time and streamlining coordination between Architects, Engineers and contractors.

Autodesk® Revit® Architecture includes a host of parametric structural components to dramatically speed up initial design processes and allows for multiuser access to complex models further streamlining initial design workflow, before exporting the entire or a partial analytical model to structural analysis software such as Autodesk® Robot™ Structural Analysis or other popular design and analysis applications.

Design: Model building components, analyze and simulate systems and structures, and iterate designs. Generate documentation from Revit models.

Interoperability: Work with members of an extended project team. Revit imports, exports, and links your data with commonly used formats, including IFC, DWG™, and DGN.

Collaborate: Multiple project contributors can access centrally shared models. This results in better coordination, which helps reduce clashes and rework.

Visualize: Communicate design intent more effectively to project owners and team members by using models to create high-impact 3D visuals

Andhra Pradesh State Skills Development Corporation

Andhra Pradesh State Skills Development Corporation provides specialized training to the Students of Engineering colleges, Polytechnics etc., in various Disciplines in different courses by conducting seven day workshops.

Inauguration Function:

All the final year students have participated in the workshop. The workshop was conducted for 7 days from 26/09/2022 to 1/10/2022.

On the first day of the workshop i.e., on 26/09/2022, the inaugural session of the workshop was conducted in Seminar Hall of Block -8 in Bullayya Engg. College Campus. The inaugural session was started with prayer song. During the inauguration the team from APSSDC, Mrs. B. Vani Priyanka were introduced by Coordinators (CH. Shilpa, M. Himangeswari).

Inaugural Session started with Prayer Song

During inaugural session, the Civil Engineering Department HOD Dr.G.T.Naidu has addressed the gathering and shared his experience and thoughts about the importance of workshop. Further he suggested students to actively learn the Architectural modeling using revit as it helps in creating job opportunities after completing the graduation.

Civil Engineering Students and Faculty members participated in Inaugural Session

Principal Dr.Deepak Chowdhary has advised students to channel their thought process in order to learn new skills. He also added the future of engineering will be revolving around Industry 4.0 and further he stressed on the importance of the workshop.

APSSDC team member Mrs. B.Vani Priyanka has addressed gathering and thanked the Chairman Sir, Principal Sir, HOD Sir, on behalf of APSSDC for taking necessary initiation and conducting the workshop.

Student Participation

After the inaugural session, the workshop has commenced in the computer lab-3 and R&D Cell. On the first day, introduction to workshop and introduction to Architectural modeling using revit were elaborated to the students.

Civil Engineering Students Introduced to Architectural Modeling using Revit

Day1: 26-9-22

Preparing the drawings by manual sheets

The program started at 9:30 am on 20-02-2023 followed by the inauguration schedule at Block-8 seminar hall with Resource person B.Vani Priyanka and T.Rohini of Aylin Technologies. Head of the department, Civil Engineering, teaching faculty and all the non-teaching faculty were present at the inauguration of One- Week Training Programme.

Day 1 started with the resource person of the day. The topic was “Preparing the drawings by manual sheets” she talked about its approach, scope, scale, philosophy, standard, control, and theme.

Day 2: 27-9-22

Introduction to Revit

On Second day of Programme, Resource persons discussed about “Introduction of REVIT”. Said words Revit is a process of preparing a drawing of an object on the screen of a computer. There are various types of drawings in different fields of engineering and sciences. In the fields of mechanical or aeronautical engineering, electrical the drawings of machine components and the layouts of them are prepared.

Day3: 28-9-22

Draw and modify tool bars Creating plans

On third day of Programme, Resource persons explained about "Draw and modify tool bars". They also taught performing Laying of floor tiles, ceiling, various commands for modify on the objects in a drawing. The most common aspect of these tools is located on the Modify panel of the Home tab. Take a minute to look through them.

Day 4 :29-9-22

Creating elevations:

On Fourth day of Programme, Resource Persons explained about “**Creating Elevations**”. They explained that developing of staircases ,ramps ,railings, plastering, painting and photos for walls every object. Some objects have properties which are specific to themselves. Text, for example, is the only object type which has a T ext Style property.

Civil Engineering Students practice of Architectural Modeling using Revit

Day 5: 30-9-22

On Fifth day of Programme, Resource persons discussed on elevations. They explained that 3D model text, creation of levels, creating compound walls sweep commands for color fill legend etc .Smart dimensioning allows you to place lengths, circular radii and diameters, arc radii and arc lengths without switching dimension tools. Smart dimensioning automatically creates appropriate dimension notes based on the types of objects you.

Creating shaft opening,Mulimicant staircase, creating topo surface You can define a block from drawing geometry either in the Block Definition dialog box or by using the Block Editor. Once the block definition is created, you can reference it in the same or a different drawing.

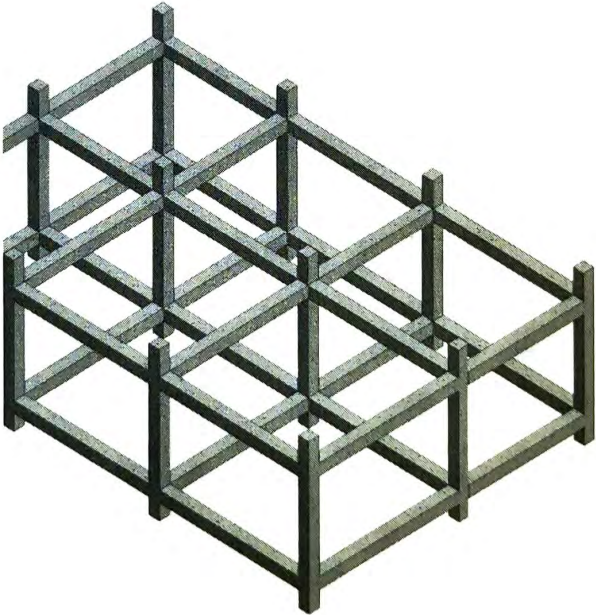

Day 6: 1-10-22

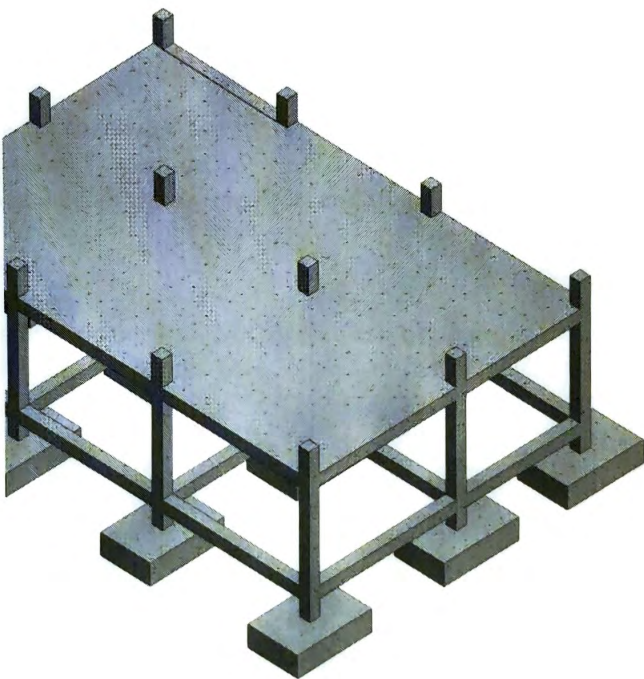

On Sixth day of Programme, Resource persons discussed on drawings. They explained that various views of the drawing methods for scheduling and documentation and also 3D model text.

Outcomes of the Events

- 1.The training program included state of art teaching using projector and the students have practiced for about 3-4 hours daily.
- 2.They have gained sufficient practical knowledge on Architectural Modeling using Revit.

Valedictory Function

The valedictory function was initiated and anchored by Ms.V.Kinnera III Btech Civil. The dais was shared by Dr.Deepak Chowdhary, Principal,DLBC, Dr.G.T.Naidu HOD, Civil Department, DLBC, APSSDC Team members, Mrs.

B. Vani Priyanka.

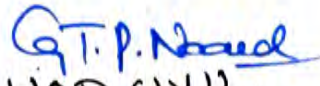

While addressing the gathering of students and faculty Coordinator Mrs.CH.Shilpa has appreciated the efforts of APSSDC Team members, all students for participating and support of co-faculty members in successfully organizing the workshop. Civil HOD Dr.G.T.Naidu has motivated students by explaining them with the benefits of Revit which helps in creating a wonderful career. He advised students for hard work and time management.

Dr.Dheepak Chowdhary, Principal, DLBC has appreciated the APSSDC Team and also students. He advised to organize similar workshops and event for the benefit of students for exploring their potentials.

The program was concluded with vote of thanks by Mr.Murali Rgahava (IIIB.Tech Civil) with a special mention to Dr.G.T.Naidu, HOD, Civil Department, Mr.CH.Shilpa, Civil Department and all faculty members and students.

The training program included state of art teaching using projector and the students have practiced for about 3-4 hours daily and have gained sufficient practical knowledge on Architectural Modeling using Revit.

Report on

Two weeks Add-on program on Sensor Technology

Duration: 2 weeks (10-10-2022 to 22-10-2022)

Resource Person: R. Sharon Fragrance (Asst. Prof. ECE Dept.)

Course Coordinators: Mrs. K.V.JAYALAKSHMI (Asst. Prof. ECE Dept.)

Mrs. RAZIA BEGUM (Asst. Prof. ECE Dept.)

Introduction

Sensor technology has become an integral part of our modern world. It's the invisible, often unsung hero that enables countless aspects of our daily lives, from the smartphone in your pocket to the environmental monitoring systems that help combat climate change. Sensors are everywhere, and their impact on society and industry is profound. In this exploration, we'll delve into the fascinating world of sensor technology, understanding its key concepts, the breadth of its applications, challenges it faces, and its transformative potential.

Understanding Sensor Technology

Sensors are devices that detect and respond to physical, chemical, biological, or environmental stimuli and convert them into measurable signals or data. These signals can then be processed, analyzed, and utilized in various applications to make informed decisions. The fundamental principle of sensor technology is the transformation of a real-world parameter into a quantifiable and actionable form.

Key Concepts in Sensor Technology

Transduction: Transduction is the process by which a sensor converts one form of energy or stimulus (e.g., light, temperature, pressure, or chemical concentration) into another, typically an electrical signal. Common transduction methods include piezoelectric, capacitive, resistive, and optical techniques.

Sensitivity: Sensitivity refers to a sensor's ability to detect small changes in the measured parameter. Highly sensitive sensors can detect minute variations, making them suitable for applications requiring precision.

Accuracy: Accuracy relates to how closely a sensor's measurements match the actual value of the parameter being measured. It's crucial in critical applications like medical devices and aerospace.

Resolution: Resolution is the smallest change in the parameter that a sensor can detect and report. High resolution is essential for tasks that require fine-grained data.

Range: The range of a sensor defines the minimum and maximum values it can measure. Choosing a sensor with an appropriate range is essential to avoid saturation or loss of data.

Response Time: Response time measures how quickly a sensor reacts to changes in the measured parameter. Fast response times are crucial for real-time applications like automotive safety systems.

Applications of Sensor Technology

Sensor technology has a wide array of applications across various industries. Here are some notable examples:

Healthcare: Medical sensors are employed in devices like blood pressure monitors, glucose meters, and MRI machines. Wearable health devices use sensors to monitor heart rate, activity levels, and more.

Automotive: Sensors are critical for vehicle safety systems, including anti-lock brakes, airbags, collision avoidance, and adaptive cruise control.

Aerospace: Sensors are used in aircraft for navigation, altitude measurement, and engine monitoring. They are also crucial in spacecraft for guidance and telemetry.

Manufacturing: Sensors are integrated into industrial processes to monitor temperature, pressure, and product quality. They play a central role in automation and quality control.

Consumer Electronics: Smartphones, smart home devices, and fitness trackers all rely on a variety of sensors, including accelerometers, gyroscopes, and ambient light sensors.

Robotics: Robots use sensors for navigation, object recognition, and collision avoidance. These sensors enable robots to interact with their environment and perform tasks autonomously.

Energy Management: Energy companies use sensors to monitor and control power generation, distribution, and consumption. Smart grids and energy-efficient technologies depend on sensor data.

Transportation: Public transportation systems use sensors for ticketing and security, while traffic management systems use sensors to monitor and control traffic flow.

Challenges in Sensor Technology

Despite their widespread use and incredible versatility, sensor technology faces several challenges:

Power Consumption: Many sensors are battery-powered, and minimizing power consumption is critical for extended operational life. Energy-efficient designs are necessary.

Calibration and Accuracy: Sensors may drift over time, affecting their accuracy. Regular calibration and maintenance are needed to ensure reliable measurements.

Miniaturization: Smaller sensors are required for compact devices, but miniaturization often comes at the cost of sensitivity and accuracy. Designing small yet reliable sensors is a significant challenge.

Interference and Noise: Environmental factors can introduce interference and noise into sensor measurements. Techniques to filter out unwanted signals are crucial for accurate data.

Environmental Durability: Sensors operating in harsh environments, like those in aerospace or underwater, need to withstand extreme conditions. Developing sensors with high durability is a significant challenge.

Security: With the growing use of sensors in IoT (Internet of Things) devices, security and privacy concerns are on the rise. Sensors need to be protected from hacking and data breaches.

Future of Sensor Technology

Sensor technology continues to evolve rapidly, and its future is filled with promise. Here are a few trends and developments to watch for:

IoT and Sensor Networks: The growth of the IoT will see an explosion of sensor deployments. Networks of sensors will provide real-time data for smart cities, agriculture, and healthcare.

AI and Machine Learning Integration: Sensors will play a critical role in the development of AI and machine learning applications. They will provide the data needed for AI systems to learn and make informed

Nanotechnology: Advances in nanotechnology will lead to smaller, more sensitive sensors that can be embedded in various materials, opening up new possibilities in materials science and healthcare.

Flexible and Wearable Sensors: Flexible and stretchable sensors will find applications in wearable technology, health monitoring, and human-computer interfaces.

Environmental and Energy Sensors: Sensors for environmental monitoring and clean energy technologies will become increasingly important in the fight against climate change.

Quantum Sensors: Quantum sensors, harnessing the properties of quantum mechanics, have the potential to revolutionize fields like navigation, imaging, and materials science.

6. Participants Participation and Feedback:

- 125

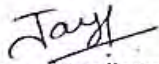

7. Participants Feedback:

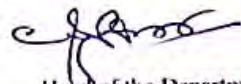

Based on the feedback forms collected:

- 91% of participants found the course content relevant and useful.
- 74% appreciated the hands-on experience.
- 25% wanted more emphasis on certain advanced topics, suggesting these could be included in a follow-up course.
- 93% expressed satisfaction with the course instructors' knowledge and teaching methods.

8. Conclusion

Sensor technology is at the heart of modern society and industry, driving innovation, automation, and improved quality of life. From the smartphones in our pockets to the satellites in space, sensors are the silent data gatherers that enable us to better understand and interact with the world around us. As technology continues to advance, sensor technology will play an increasingly pivotal role, shaping the future of our interconnected world. Whether it's monitoring our environment, improving our health, or making our devices smarter, sensors are at the forefront of technological progress, one data point at a time.

About CIVIL Engineering Department:

The Department of Civil Engineering was established in the year 2010, with an annual intake of 60 students for B.Tech. Programme. At present the Department intake for undergraduate (B.Tech.) is 60. The Department has a mix of both experienced and young faculty. Majority of the faculty members actively involve themselves in improving their education qualifications and research works. Faculty and students are encouraged to attend and participate in various seminars, workshops and training programs conducted by various reputed organizations to enhance their knowledge. The management also supports the faculty members with financial assistance to attend workshops, conferences, and seminars.

The Civil Department is well equipped with spacious laboratories and experienced technicians. The department of Civil Engineering also offers various consultancy works.

About The Course:

In its pursuit of excellence in technical education The Department of Civil Engineering of Bullayya Engineering college have organized the "ADD-ON course on Architectural Modeling using AutoCAD" from 20/02/2023 to 25/02/2023, in Computer Lab of Block 7. With an objective to develop students' practical knowledge with respect to planning and architecture and also to introduce BIM which is Industry 4.0 in Civil Engineering to the students, the "ADD-ON course on Architectural Modeling using AutoCAD" has been organized. This workshop gives the additional knowledge to the students in addition to the regular curriculum.

Report on
One week Add-on course on
Architectural Modelling Using AUTOCAD
From: 20-02-2023 to 25-02-2023.
Organized by

Department of Civil Engineering
Dr. Lankapalli Bullayya College of Engineering
(Affiliated to Andhra University and Approved By AICTE)
Visakhapatnam – 530013

Day-1 20-02-2023:

Preparing the drawings by manual sheets

The program started at 9:30 am on 20-02-2023 followed by the inauguration schedule at Block-8 seminar hall with Resource person M.Kumar and M.Praveen of Aylin Technologies. Head of the department, Civil Engineering, teaching faculty and all the Non-teaching faculty were present at the inauguration of One- Week Training Programme.

Day 1 started with the resource person of the day. The topic was "Preparing the drawings by manual sheets" He talked about its approach, scope, scale, philosophy, standard, control, and theme.

Inauguration at Block-8 Seminar Hall

Day-2 21-02-2023

Introduction of AutoCAD

On Second day of Programme, Resource persons discussed about "Introduction of AutoCAD". Said words Computer Aided Drafting is a process of preparing a drawing of an object on the screen of a computer. There are various types of drawings in different fields of engineering and sciences. In the fields of mechanical or aeronautical engineering, the drawings of machine components and the layouts of them are prepared.

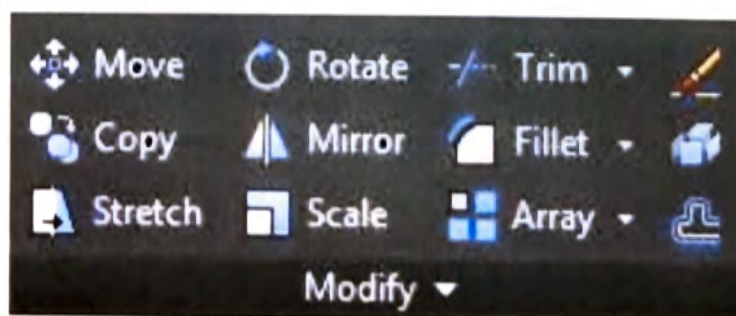

Students practicing lab session

Day-3 22-02-2023

Draw and modify tool bars Creating plans

On third day of Programme, Resource persons explained about "Draw and modify tool bars". They also taught performing editing operations such as erase, move, and trim on the objects in a drawing. The most common aspect of these tools is located on the Modify panel of the Home tab. Take a minute to look through them.

Practice on CAD drawings

Day-4 23-02-2023

Creating elevations:

On Fourth day of Programme, Resource Persons explained about “**Creating Elevations**”. They explained that every Auto CAD object, such as a line or a circle has properties. Some properties such as Color, Line type and Layer are common to all objects. Some objects have properties which are specific to themselves. Text, for example, is the only object type which has a Text Style property.

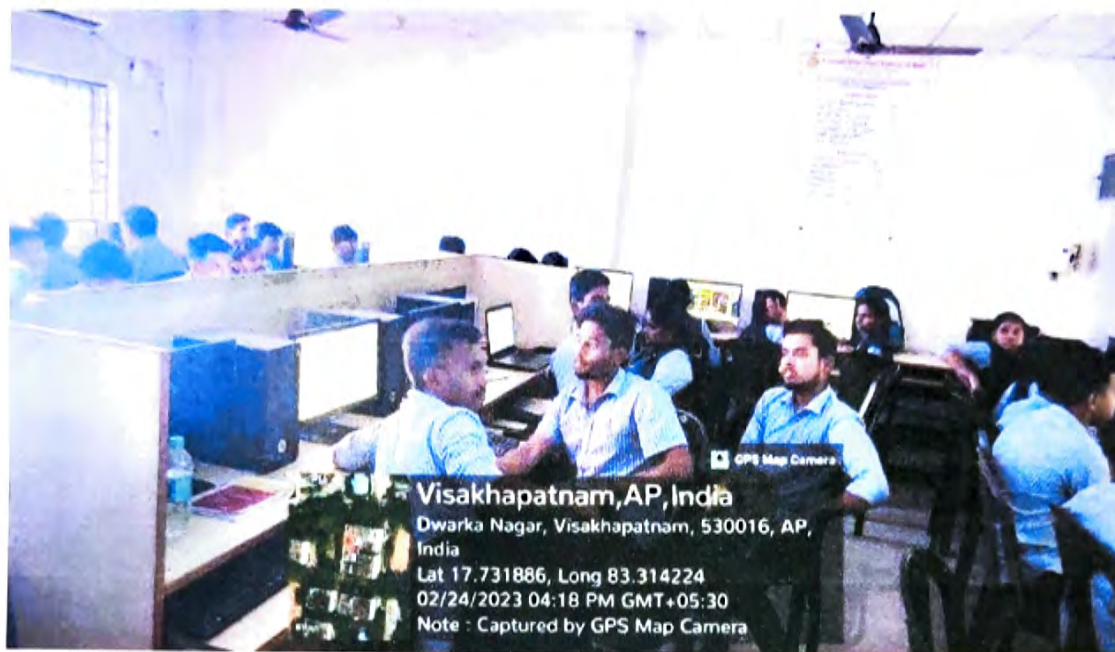

Day-5 24-02-2023

On Fifth day of Programme, Resource persons discussed on elevations. They explained that Smart dimensioning allows you to place lengths, circular radii and diameters, arc radii and arc lengths without switching dimension tools. Smart dimensioning automatically creates appropriate dimension notes based on the types of objects you.

Day-6 25-02-2023

A block is essentially a block definition that includes the block name, the block geometry, the location of the base point to be used for aligning the block when you insert it, and any associated attribute data. You can define a block from drawing geometry either in the Block Definition dialog box or by using the Block Editor. Once the block definition is created, you can reference it in the same or a different drawing.

The block definition in the following illustration comprises a name, four lines, and a base point at the intersection of the two diagonal lines. In this (and in the second example), when the block is saved, the geometry is removed from the drawing area.

The valedictory function was initiated and anchored by K. Bashya Sree, III B.Tech Civil. The dais was shared by Dr. Deepak Chowdhary, Principal Dr. Lankapalli Bullayya College of Engineering, Dr. G. T. Naidu HOD, Civil Department, Dr. Lankapalli Bullayya College of Engineering, AYLIN Team members, Mr. M. Kumar & Mr. M. Praveen

While addressing the gathering of students and faculty, Coordinator Mrs. CH. Shilpa has appreciated the efforts of AYLIN Team members, all students for participating and support of co-faculty members in successfully organizing the workshop. Civil HOD Dr. G. T. Naidu has motivated students by explaining them with the benefits of Architecture which helps in creating a wonderful career.

Dr. Deepak Chowdhary, Principal, Dr. Lankapalli Bullayya College of Engineering, has appreciated the AYLIN Team and also the students. He advised to organize similar workshops and event for the benefit of students for exploring their potentials.

The program was concluded with vote of thanks with a special mention to Dr. G. T. Naidu, HOD, Civil Department, Mrs. CH. Shilpa, Civil Department, and all faculty members and students.

Course Out Comes

1. After completing the AUTOCAD training, individuals can work as Structure Designers, Project Managers, Building Analysts, Quality Analysts, Bridge, Designers etc
2. Very good opportunity for students to interact with Experts.
3. Develops confidence and helps to enhance their interpersonal skills

About CIVIL Engineering Department:

The Department of Civil Engineering was established in the year 2010, with an annual intake of 60 students for B.Tech. Programme. At present the Department intake for undergraduate (B.Tech.) is 60. The Department has a mix of both experienced and young faculty. Majority of the faculty members actively involve themselves in improving their education qualifications and research works. Faculty and students are encouraged to attend and participate in various seminars, workshops and training programs conducted by various reputed organizations to enhance their knowledge. The management also supports the faculty members with financial assistance to attend workshops, conferences, and seminars.

The Civil Department is well equipped with spacious laboratories and experienced technicians. The department of Civil Engineering also offers various consultancy works.

About The Course:

In its pursuit of excellence in technical education The Department of Civil Engineering of Bullayya Engineering college have organized the "ADD-ON course on Structural Modeling using Staad Pro" from 13/03/2023 to 18/03/2023, in Computer Lab of Block 7. With an objective to develop students' practical knowledge with respect to planning and architecture and also to introduce BIM which is Industry 4.0 in Civil Engineering to the students, the "ADD-ON course on Structural Modeling using Staad Pro" has been organized. This ADD-ON course gives the additional knowledge to the students in addition to the regular curriculum.

Report on
One week Add-on course on
STAAD-PRO
From: 13-03-2023 to 18-03-2023.

Organized by
Civil Engineering Department

About Civil Engineering Department:

The Department of Civil Engineering was established in the year 2010, with an annual intake of 60 students for B.Tech. Program. At present the Department intake for undergraduate (B.Tech.) is 60. The Department has a mix of both experienced and young faculty. Majority of the faculty members actively involve themselves in improving their education qualifications and research works. Faculty and students are encouraged to attend and participate in various seminars, workshops and training programs conducted by various reputed organizations to enhance their knowledge. The management also supports the faculty members with financial assistance to attend workshops, conferences, and seminars.

About The Training Programme:

Civil Engineering Department has conducted "STAAD-PRO" from 13/3/2023 to 18/3/2023. The objective of the Programme is to strengthen the technical skills and also to promote the participating and organizing skills in the students, This Programme has been conducted in computer lab at Bullayya Engineering college BLOCK-8

Day-1 -13/03/2023

Preparing the drawings by manual sheets

The program started at 9:30 am on -02-2023 followed by the Inaguration schedule at Block-8 seminar hall with Resource person Ms.Priyanka and Ms.Navya in Association with Aylin Technologies. Head of the department, Civil Engineering teaching faculty and all the Non-teaching faculty were marking the inauguration of One-Week Training Programme.

Day 1 started with the resource person of the day. Her topic was "Introduction to staad pro.Methods.Loads" She talked about its approach, scope, scale, philosophy, standard, control and theme..

Inaguration at Block-8 Seminar hall in Bullayya Engineering College

Day-2-14/03/2023

Introduction of StaadPro

On Second day of TRAINING PROGRAMME ,Resource persons Disusses about“Beam analysis and Frame analysis”

Students practicing lab session

Day-3-15/03/2023

On third day of TRAINING PROGRAMME, Resouce persons said about” Plan geometry creation ,Staad Properties creation & assigning to the created model”

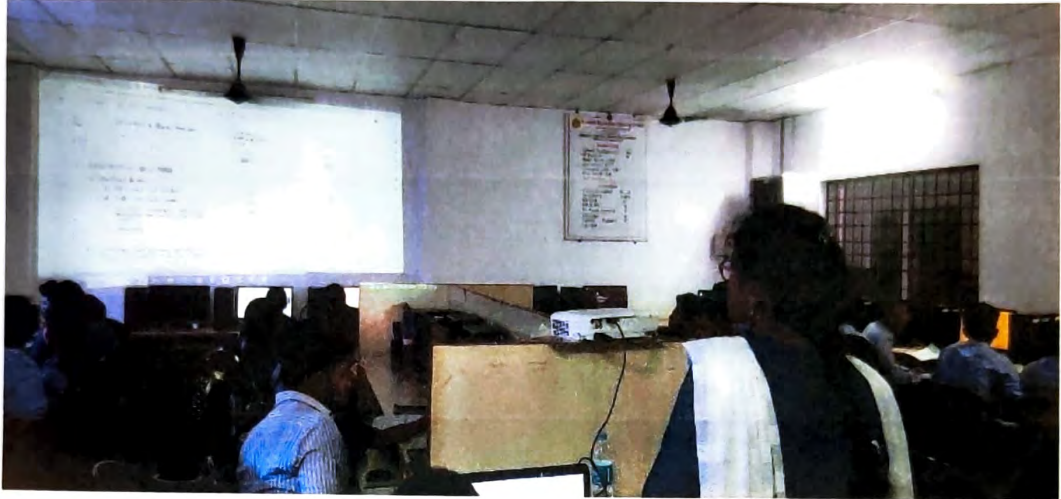

Day-4 – 16/03/2023

Creating elevations:

On Fourth day of TRAINING PROGRAMME ,explained about "LOAD".

- Application of Dead & Live loads to the created Model
- Staircase creation and application of properties
- Creation of Headroom's for both Stair case and lift area

Day-5 -17/03/2023

On Fifth day of TRAINING PROGRAMME , Resource persons discussed on

- Wind Load Manual calculations according to IS 875(Part-3)- 2015
- Application of Wind Load to the model as per calculation's
- Beam and column Layouts Creation
- Checking the Duplicate Items

Day-6 -18/03/2023

On Sixth day of TRAINING PROGRAMME , Resource persons discussed on

- Rectifying the errors in the analysis
- Seismic load calculations according to IS 1893(Part-1)- 2002
- Application of Seismic load to the model
- Analysis

Practice session by Resource Persons.

Practice on Staad-Pro

VALIDICTORY:

The valedictory function was initiated and anchored by U.VASANTHI of III Btech Civil. The dais was shared by Dr.Deepak Chowdhary, Principal,DLBC, Dr.G.T.Naidu HOD, Civil Department, DLBC, AYLIN Team members, Ms.Navya and Ms.Priyanka

While addressing the gathering of students and faculty Coordinators Mrs.M.Himangerswari and Mrs.B.Ramya has appreciated the efforts of AYLIN Team members, all students for participating and support of co-faculty members in successfully organizing the workshop. Civil HOD Dr.G.T.Naidu has motivated students by explaining them with the benefits of Architecture which helps in creating a wonderful career. He advised students for hard work and time management.

Dr.D.Dheepak Chowdhary, Principal, DLBC has appreciated the AYLIN Team and also students. He advised to organize similar workshops and event for the benefit of students for exploring their potentials.

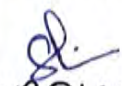

The program was concluded with vote of thanks with a special mention to Dr.G.T.Naidu, HOD, and Civil Department, Civil Department and all faculty members and student

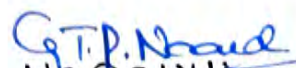

Course Outcomes

1. Students will learn the use of software Staad pro
2. Students will learn the design of RC structures using software Staad.pro

Course OutComes

1. After completing the STAAD.Pro training, individuals can work as Structure Designers, Project Managers, Building Analysts, Quality Analysts, Bridge, Designers etc
2. . Very good opportunity for students to interact with Experts.
- 3 .Develops confidence and helps to enhance their interpersonal skills.

FOUR WEEKS ADD-ON PROGRAM ON C++ POWER SURGE is an intensive and specialized educational initiative designed to empower participants with advanced knowledge and practical skills in C++, a powerful and versatile programming language. Over the course of five weeks, the program delves deep into C++ concepts, including advanced programming techniques, software development, and application in real-world scenarios.

C++ POWER SURGE COURSE OBJECTIVES

- Advanced C++ proficiency.
- Effective problem-solving skills.
- Competence in robust software development.
- Application of C++ in real-world scenarios.
- Knowledge of performance optimization.
- Capability to implement and optimize algorithms.
- Proficiency in object-oriented programming.
- Cross-platform development skills.
- Strong debugging and troubleshooting abilities.
- Awareness of code security best practices.

COURSE OUTCOME

- Advanced C++ proficiency.

Report on FOUR WEEKS ADD-ON PROGRAM ON C++ POWER SURGE

Duration: 18-03-2023 to 24-04-2023

The Four Weeks Add-On Program on C++ Power Surge is an intensive and advanced training initiative designed to enhance participants' proficiency in C++ programming. This program focuses on providing a deep dive into advanced C++ concepts, tools, and methodologies, aiming to empower participants with the skills required to tackle complex programming challenges.

Program Overview:

The program spans Four weeks and covers a range of topics with a combination of online lectures, hands-on coding exercises, and weekly project assignments.. Each week is dedicated to a specific aspect of Industry experts with extensive experience in C++ development and Virtual learning environment with interactive coding environments.

Duration: Four weeks

Objective:

The primary objective of this program is to elevate participants' C++ programming skills to an advanced level, enabling them to tackle real-world programming scenarios with confidence. Emphasis will be placed on mastering topics such as multithreading, template metaprogramming, memory management, and advanced data structures.

Target Audience:

This program is designed for intermediate to advanced C++ developers looking to deepen their understanding of the language and broaden their skill set. Software engineers, developers, and computer science professionals seeking to excel in C++ development will find this program beneficial.

Number of Students Attended: 141

Details of the Resource Person: 1) Dr. D. Madhavi,

Professor & HOD,

CSE Department,

Dr.Lankapalli Bullayya College of Engineering for Women.

2) Mrs. P. RayaLakshmi,

Assistant Professor,

CSE Department,

Dr.Lankapalli Bullayya College of Engineering for Women.

Dr. Lankapalli Bullayya College of Engineering

New Resapuvani Palem, Visakhapatnam

Sponsored by Society of Collegiate Education

Approved by AICTE, Affiliated to Andhra University

3) Mr. D. Srikanth,
Sr. Assistant Professor,
CSE Department,
Dr.Lankapalli Bullayya College of Engineering for Women.

Methodology:

The program will adopt a hands-on learning approach, combining theoretical knowledge with practical coding exercises. Each week will cover a specific advanced topic, with participants engaging in coding challenges and collaborative projects. Live Q&A sessions and peer-to-peer learning forums will be integral to the learning process.

Outcome:

Upon completion of the Four Weeks Add-On Program on C++ Power Surge, participants

can expect to:

- Master advanced C++ concepts and techniques.
- Develop proficiency in multithreading and concurrent programming.
- Acquire skills in template metaprogramming and advanced data structures.
- Demonstrate competence in memory management and optimization techniques.
- Apply acquired knowledge to real-world projects and coding scenarios.

Conclusion:

The Four Weeks Add-On Program on C++ Power Surge is a transformative learning experience for C++ developers seeking to elevate their programming skills. By combining theoretical depth with hands-on practice, participants will emerge from the program well-equipped to tackle the challenges of advanced C++ development. This initiative reflects our commitment to empowering professionals with the knowledge and skills necessary to excel in today's dynamic programming landscape.

CIRCULAR

The Department of Electrical and Electronics Engineering is conducting a **One-week Add-On-Course on Development and Experimental Investigation for the Efficiency improvement of Solar Photovoltaic Power Plants in High ambient temperatures (observation of the Republic of India)** from **17-04-2023 to 21-04-2023**. The resource person will deliver their expertise to the students.

All the II, III, IV B.Tech EEE Students are informed to attend the Add-On-Course without fail.

ABOUT THE EEE DEPARTMENT

The Department of Electrical and Electronics Engineering was established in the year 2010 with an annual intake of 60 students for B.Tech Program. The Department has a mix of both experienced and young faculty. All the faculty members actively involve themselves in improving their education qualifications and research works. Faculty and students are encouraged to attend and participate in various seminars, workshops and training programs conducted by various reputed organizations to enhance their knowledge. The management also supports the faculty members with financial assistance to attend workshops, conferences and seminars.

ABOUT THE COURSE

In pursuit of technical education the department of Electrical and Electronics Engineering of Dr.Lankapalli Bullayya College of Engineering have organized the ADD-ON Course on "Development and Experimental Investigation for the Improvement efficiency of Solar Photovoltaic Power Plants in High ambient temperatures (observation of the Republic of India)" from 17/04/2023 to 21/04/2023, with an objective to develop students practical knowledge with respect to Solar PV system. This workshop is organized to provide additional knowledge to the students in addition to the regular curriculum.

***Report on
One Week Add-on Course
Development and Experimental Investigation for the Efficiency
Improvement of Solar Photovoltaic Power Plants in High Ambient
Temperatures (Observations of the Republic of India)***

Duration: 17-04-2023 to 21-04-2023

Solar Photovoltaic (PV) power plants are a promising renewable energy source for India, given the country's vast solar potential. With increasing concerns over climate change, India's commitment towards renewable energy has been robust. However, high ambient temperatures can degrade the performance and efficiency of solar PV cells. This report elaborates on the findings of a one-week add-on course aimed at studying and enhancing the efficiency of solar PV power plants operating under high ambient temperatures.

Details of the Resource Person: Dr. Seepana Praveen Kumar,
Senior Scientific Officer, Department of Nuclear and Renewable Energy Sources,
Ural Power of Engineering Institute, Ural Federal University, Russia

Details of the Program Coordinators: S Varalakshmi
Assistant Professor, EEE Department
Dr. Lankapalli Bullayya College of Engineering.

Number of Students Attended: 138

1. Introduction

The Republic of India, with its diverse climatic conditions, often faces high ambient temperatures that can influence the efficiency of solar photovoltaic (PV) power plants. This course delves into research initiatives and experimental studies aimed at enhancing the performance of these PV systems under such challenging conditions. Drawing from on-ground observations in India, this investigation provides crucial insights and solutions for solar energy utilization in hot regions.

2. Course Objectives

The course aims to equip participants with an understanding of the challenges high temperatures pose to solar PV efficiency, introduce experimental methodologies to assess these impacts, and explore technological solutions to enhance performance under such conditions. Drawing from real-world scenarios, notably in regions like the Republic of India, the course bridges the gap between theory and practice in solar energy optimization.

3. Course Highlights

- Introduction and Background of Solar PV Systems
- Technical Aspects of PhotoVoltaic Systems
- Case Studies & Practical Insights
- Experimental Approaches & Methods
- Innovations & Solutions of PV Systems

4. Learning Outcomes:

- Participants will grasp the fundamental principles governing the operation of solar photovoltaic systems and understand how high ambient temperatures impact their efficiency.
- Learners will gain the skills to design and conduct experimental studies, assessing the real-world performance of solar PV systems under elevated temperature conditions.
- Participants will develop proficiency in analyzing experimental results, identifying efficiency patterns, and formulating solutions based on data-driven insights.
- Equipped with knowledge and analysis, learners will be capable of recommending and integrating technological advancements to optimize solar PV performance in high-temperature environments.

5. Photograph

6. Participants Feedback:

Based on the feedback forms collected:

- 95% of the participants found the course content relevant and useful.
- 85-90% of the participants gave 'Excellent' or 'Very Good' rating.

7. Conclusion

The course provided valuable insights into the challenges faced by solar PV plants in India due to high ambient temperatures. It also pointed towards potential solutions that can be implemented to ensure the sustainable growth of solar energy in India.
